**Bharati Vidyapeeth (Deemed To Be University), Pune India**  
**Faculty of Management Studies (Board of Studies in Computer Applications and**  
**System Studies)**  
**Master of Computer Applications Programme (2022 Course)**  
**(Under Choice Based Credit System)**  
**To be effective from 2022-23 at Part I**

**I. INTRODUCTION:**

The MCA Program is a full time 108 credits programme offered by Bharati Vidyapeeth (Deemed to be University), Pune and is conducted in regular and distance mode at its Management Institutes in Pune, Karad, Kolhapur, Sangli, and Solapur. This programme is also conducted in online mode at CDOE under BV(DU). All the five institutes have excellent faculties, laboratories, library, and other facilities to provide proper learning environment. The University is reaccredited by NAAC with an 'A+' grade (3rd cycle). The expectations and requirements of the software industry, immediately and in the near future, are visualized while designing the MCA programme. This effort is reflected in the Vision and Mission statements of the MCA programme. Of course, the statements also embody the spirit of the vision of Late Dr. Patangraoji Kadam, the Founder of Bharati Vidyapeeth and Chancellor, Bharati Vidyapeeth Deemed to be University which is to usher in “Social Transformation through Dynamic Education.”

**II. VISION STATEMENT OF MCA PROGRAMME**

Achieve excellence in Computer Applications with respect to teaching, learning and research to meet the growing needs of the industry and society.

**III. MISSION STATEMENT OF MCA PROGRAMME**

- Promote outcome-based learning strategies in-order to meet global industry standards.
- Encourage innovations and problem-solving capabilities in students and faculty.
- Cultivate collaborative research in both, students and faculty members through industry interactions and collaborations.
- Enhance entrepreneurship skills among students.

#### **IV. PROGRAMME UNIQUE FEATURES**

Keeping the view of National Education Policy, MCA Programme is designed with following features

- MCA is 2 year masters programme with 114 credits.
- The structure of programme is common for all learning modes - Regular, Distance, Online
- Provision to acquire interdisciplinary knowledge through MOOCs covering total 12 credits.
- Interdisciplinary General Courses covering Human Ethical Values, Life Skills, Swachh Bharat, Environmental Studies to make students aware about environment concerns and human values.
- Students can choose any of the elective group through which he/she will be trained in specialized area for better career.
- Internship project provides a platform which gives acquaintance for solving IT problems.

#### **V. PROGRAMME OBJECTIVES**

**1:** To build a strong foundation for students to become proficient in all academic concepts and technical skills necessary to become an IT Professional.

**2:** To provide a conducive environment for designing, implementing and testing various software applications through Software Development.

**3:** To keep the students and faculty abreast with the emerging technologies in the field of computer applications.

**4:** To bring professionalism amongst the students and promote holistic development.

**5:** To involve students in sustainable IT practices and community services.

## **VI. PROGRAMME OUTCOMES (PO)**

**PO1: Computational Knowledge:** Apply knowledge of computing fundamentals, mathematics and given domain to design appropriate models for a given problem and/or requirements.

**PO2: Problem Analysis:** Apply fundamental knowledge of software engineering and various systems domain in order to analyze, identify, formulate and provide the solution to given problem.

**PO3: Design/Development of Solutions:** Design and evaluate solutions, systems, modules and processes for specified set of needs with appropriate consideration of societal values and industry expectations.

**PO4: Conduct research in Computing problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

**PO5: Modern Tool Usage:** Use of modern tools for delivering milestones like problem analysis, design, development, testing and deployment.

**PO6: Professional Ethics:** Learn and inculcate professional ethics, cyber regulations, professional responsibilities and norms of professional computing world.

**PO7: Lifelong Learning:** Acknowledge the need for continuous professional development and practice it through self-motivated, independent learning.

**PO8: Management Domain:** Involving in projects development as individual or group to solve problems in various domains and environments using computational and management skills.

**PO9: Communication Efficacy:** Demonstrate efficacy in verbal and non-verbal means of communication like reports, design documentation and presentations to elaborate about complex computing.

**PO10: Innovation and Entrepreneurship:** Provide conducive environment for innovation and entrepreneurship leading to solutions for betterment of society.

## **VII. PROGRAMME SPECIFIC OUTCOMES**

**PSO1:** Ability to learn the various programming languages with database concepts and development environment

**PSO2 :** Ability to apply theoretical and practical knowledge to solve business problems in effective software solution through data communication technology concepts.

**PSO3 :** Enrich the knowledge in the areas of Advanced technologies and business practices.

**PSO4 :** Foster analytical and critical thinking abilities for efficient programming

**PSO5 :** Flourish the innovation and research attitude to develop IT artefact.

**PSO6 :** Maintain the personality with environmental and social concerns

## **VIII. ELIGIBILITY FOR ADMISSION:**

Admission to the programme is open to any Graduate (10+2+3) of any recognized University satisfying the following conditions.

1. Passed BCA/ Bachelor Degree in Computer Science Engineering or equivalent Degree. OR Passed B.Sc./ B.Com./ B.A. with additional bridge Courses (Bridge Course I/ Bridge Course II )as per the norms of the University.

OR

- Passed any graduation degree (e.g. BE/ BTech/ BSc/BCom/BA/B.Voc/ etc) preferably with mathematics at 10+2 level or at Graduation Level
2. The candidate should have secured at least 50% marks (45% for SC/ST) in aggregate at graduate level university examination.
  3. For students having no Mathematics background compulsory bridge course framed by the Bharati Vidyapeeth (Deemed to be University) and additional bridge course related to computer subjects should be completed
  4. The candidate studying in final year of Bachelor's degree may also apply. Admission of such candidates will remain provisional until submission of final result certificates in original.

5. Subject to the above conditions, the final admission of final admission is based solely on –
  - a. The merit at All India Entrance Test conducted by Bharati Vidyapeeth (Deemed to be University), Pune.
  - b. Submission of Migration Certificate, Transfer Certificate, anti-ragging affidavit etc.

## **IX. DURATION OF THE PROGRAMME**

The duration of this programme is two years divided into four semesters or a minimum of 114 credits whichever is later. The medium of instruction and examination will be only English.

## **X. MOOC Policy :**

The Bharati Vidyapeeth (Deemed to be University), Pune offering MOOCS stands for Massive Open Online Courses Subjects. The student will complete MOOC courses prescribed by Institute from following sources in respective semester and will be evaluated based on the scores obtained by the Student/Learner in MOOCs.

Following are the sources from where Students/Learners can undertake MOOCs

1. iimb.ac.in
2. swayam.gov.in
3. alison.com
4. edx.org
5. nptel.com (technical courses)
6. Coursera
7. harvardx.harvard.edu
8. udemy.com
9. futurelearn.com
10. Indira Gandhi National Open University (IGNOU)
11. National Council of Educational Research and Training (NCERT)
12. National Institute of Open Schooling (NIOS)
13. National Programme on Technology Enhanced Learning (NPTEL)

**Important Note:**

- Students can complete MOOCs anytime during 02 years from the time being admitted to Programme
- Students have to submit completion Certificate of MOOCs. Unless certificate of all 03 MOOCs submitted, Fourth Semester Marksheet will not be issued.

**XI. SCHEME OF EXAMINATION:**

For some courses there is Internal Assessment (IA) conducted by the respective institutes as well as a University Examination (UE) at the End-of-the Term. UE will be conducted out of 60 marks and IA will be conducted for 40 marks then these are converted to grade points and grades as per the Table I. For courses having only Continuous Assessment (CA) the respective institutes will evaluate the students in varieties of ways during the term for a total of 100 marks. Then the marks will be converted to grade points and grades using the Table I.

**XII. STANDARD OF PASSING:**

For all courses, both UE and IA constitute separate heads of passing (HoP). In order to pass in such courses and to earn the assigned credits, the student/learner must obtain a minimum grade point of 5.0 (40% marks) at UE and also a minimum grade point of 5.0 (40% marks) at IA.

If Student fails in IA, the learner passes in the course provided, he/she obtains a minimum 25% marks in IA and GPA for the course is at least 6.0 (50% in aggregate). The GPA for a course will be calculated only if the learner passes at UE.

A student who fails at UE in a course has to reappear only at UE as backlog candidate and clear the Head of Passing. Similarly, a student who fails in a course at IA he has to reappear only at IA as backlog candidate and clear the Head of Passing. to secure the GPA required for passing.

The 10 point Grades and Grade Points according to the following table

Range of Marks (%)	Grade	Grade Point
$80 \leq \text{Marks} \leq 100$	O	10
$70 \leq \text{Marks} \leq 80$	A+	9
$60 \leq \text{Marks} \leq 70$	A	8
$55 \leq \text{Marks} \leq 60$	B+	7
$50 \leq \text{Marks} \leq 55$	B	6
$40 \leq \text{Marks} \leq 50$	C	5
Marks < 40	D	0

**Table I : Grade Points and Grades**

The performance at UE and IA will be combined to obtain GPA (Grade Point Average) for the course. The weights for performance at UE and IA shall be 60% and 40% respectively.

GPA is calculated by adding the UE marks out of 60 and IA marks out of 40. The total marks out of 100 are converted to grade point, which will be the GPA.

### **Rules of ATKT**

For course upto four semesters, a student is allowed to carry any number of Backlogs of a prescribed course in Sem-I, II, III to Sem-IV provided he appears and have backlogs

A student can appear for any four continuous semesters in an examination season including the regular semester, provided the student has appeared and have backlogs for other three semesters.

### **Formula to calculate Grade Points (GP)**

Suppose that “Max” is the maximum marks assigned for an examination or evaluation, based on which GP will be computed. In order to determine the GP, Set  $x = \text{Max}/10$  (since we have adopted 10 point system). Then GP is calculated by the following formulas

Range of Marks	Formula for the Grade Point
$8x \leq \text{Marks} \leq 10x$	10
$5.5x \leq \text{Marks} \leq 8x$	Truncate (M/x) +2
$4x \leq \text{Marks} \leq 5.5x$	Truncate (M/x) +1

Two kinds of performance indicators, namely the Semester Grade Point Average (SGPA) and the Cumulative Grade Point Average (CGPA) shall be computed at the end of each term. The SGPA measures the cumulative performance of a learner in all the courses in a particular semester, while the CGPA measures the cumulative performance in all the courses since his/her enrollment. The CGPA of learner when he /she completes the programme is the final result of the learner.

The SGPA is calculated by the formula

$$SGPA = \frac{\sum Ck * GPk}{\sum Ck}$$

where, Ck is the Credit value assigned to a course and GPk is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study during the Semester, including those in which he/she might have failed or those for which he/she remained absent. **The SGPA shall be calculated up to two decimal place accuracy.**

The CGPA is calculated by the following formula

$$CGPA = \frac{\sum C_k * GP_k}{\sum C_k}$$

where, Ck is the Credit value assigned to a course and GPk is the GPA obtained by the learner in the course. In the above, the sum is taken over all the courses that the learner has undertaken for the study from the time of his/her enrollment and also during the semester for which CGPA is calculated. The CGPA shall be calculated up to two decimal place accuracy.

**The formula to compute equivalent percentage marks for specified CGPA:**

% marks (CGPA)	10 * CGPA-10	If $5.00 \leq \text{CGPA} \leq 6.00$
	5 * CGPA+20	If $6.00 \leq \text{CGPA} \leq 8.00$
	10 * CGPA-20	If $8.00 \leq \text{CGPA} \leq 9.00$
	20 * CGPA-110	If $9.00 \leq \text{CGPA} \leq 9.50$
	40 * CGPA-300	If $9.50 \leq \text{CGPA} \leq 10.00$

**XIII. Award of Honors :**

A student who has completed the minimum credits specified for the programme shall be declared to have passed in the programme. The final result will be in terms of letter grade only and is based on the CGPA of all courses studied and passed. The criteria for the award of honours are given below.

Range of CGPA	Final Grade	Performance Descriptor	Equivalent Range of Marks (%)
$9.5 \leq \text{CGPA} \leq 10$	O	Outstanding	$80 \leq \text{Marks} \leq 100$
$9.0 \leq \text{CGPA} \leq 9.49$	A+	Excellent	$70 \leq \text{Marks} \leq 80$
$8.0 \leq \text{CGPA} \leq 8.99$	A	Very Good	$60 \leq \text{Marks} \leq 70$
$7.0 \leq \text{CGPA} \leq 7.99$	B+	Good	$55 \leq \text{Marks} \leq 60$
$6.0 \leq \text{CGPA} \leq 6.99$	B	Average	$50 \leq \text{Marks} \leq 55$
$5.0 \leq \text{CGPA} \leq 5.99$	C	Satisfactory	$40 \leq \text{Marks} \leq 50$
CGPA below 5.0	F	Fail	Marks below 40

**Important Note:**

- Student or Learner is expected to write Two Research Papers and publish it in Peer Reviewed Journals.
- A Student /Lerner can carry any number of backlog paper till Semester-IV provided his/her academic term(s) is/are granted

#### **XIV.Question Paper Patterns for University Examination:**

**Question Paper Pattern for University Examinations (Common for Regular and Distance mode)**  
**[The marks will be converted to appropriate UE : IA ratio]**

*The pattern of **question paper** for the courses having University Examinations will be as follows:*

**Title of the Course**

**Day:**

**Total Marks: 100**

**Date:**

**Time: 3 Hours**

**Instructions:**

- a. Attempt any FIVE questions from Section I Each question carries 12 Marks.**
- b. Attempt any TWO questions from Section II Each question carries 20 Marks.**

#### **SECTION – I**

*It should contain 06 questions covering the syllabus & should test the conceptual knowledge of the students*

<b>Question</b>	<b>Marks</b>
Q.1 .....	(12 marks)
Q.2 .....	(12 marks)
Q.3 .....	(12 marks)
Q.4 .....	(12 marks)
Q.5 .....	(12 marks)
Q.6 Write <b>Short Notes</b> on ANY TWO	(12 marks)

#### **SECTION – II**

*It should contain 03 questions covering the entire syllabus & should be based on application of the Concepts*

Q.7.....	(20 marks)
Q.8.....	(20 marks)
Q.9.....	(20 marks)

## Question Paper Pattern for University Examinations (Online Mode)

*The pattern of **question paper** for the courses having University Examinations will be as follows:*

### Title of the Course

**Day :**

**Total Marks: 70**

**Date:**

**Time: 03 Hours**

**Instructions: 50 Marks objective questions**

**Subjective 20 marks. Solve any FOUR, each carries 5 marks**

### SECTION-I

<b>Question 1</b>	<b>Marks(50)</b>
<b>25 Objective Questions carrying 2 Marks each</b>	

### SECTION – II

<i>It should contain 06 questions covering the syllabus &amp; should test the conceptual knowledge of the students</i>	
<b>Question</b>	<b>Marks</b>
Q.2 .....	(5 marks)
Q.3 .....	(5 marks)
Q.4 .....	(5 marks)
Q.5 .....	(5 marks)
Q.6 .....	(5 marks)
Q.7 .....	(5 marks)

### XV.SEMESTER WISE COURSE STRCTURE

	Semester I	Credits	Hours/Week			IA Marks	UE Marks
			L	T	P		
101	Applied Database Management Systems	4	3	1	-	40	60
102	Computer Networks	4	3	1	-	40	60
103	Java Programming	4	3	1	-	40	60
104	Computational Statistics	4	3	1	-	40	60
105	Management Concepts and Applications	4	3	1	-	40	60
106	Lab on Applied Database Management Systems	3	1	0	4	40	60
107	Lab on Java Programming	3	0	0	6	40	60
108	MOOCS-I *	4	Online	-	-	50	00

<b>Sr. No.</b>	<b>(309) Open course – III</b>
<b>1</b>	<b>Social Change in Technology</b>
<b>2</b>	<b>Water Management</b>
<b>3</b>	<b>Economics for IT Industry</b>

	<b>Semester IV</b>	<b>Credits</b>	<b>Hours/Week</b>			<b>IA Marks</b>	<b>UE Marks</b>
			L	T	P		
401	Seminar on Recent Trends in IT <sup>#</sup>	4	-	-	-		100
402	El-GRP - 1 (B)	3	2	1	-	100	-
403	El-GRP –2 (B)	3	2	1	-	100	-
404	Major Internship Project	10	-	-	-	-	100
		<b>20</b>	<b>07</b>	<b>07</b>	<b>-</b>	<b>200</b>	<b>200</b>

**Practical Examinations:**

For courses 106, 107, 205, 206 and 306 University Practical Examination will be held and marks will be reported to the University.

**Project Guidelines:****Minor Project I (207) and Minor Project II(307)**

Students are expected to choose a problem which will provide software solutions. The project should be based on the courses student students studied in the previous semester. The projects can be completed as individual project or if the scope of the project is comprehensive then project can be divided into modules by the project guide and a group of students can work on it. The number of students in the group can be decided by project guide and it should not be less than 2 and more than 4. Every student or group must have meeting about progress of project with their project guide regularly as specified in time table or if required at a communicated by guide.

The project dissertation/document is expected to be created and it should have the following contents.

- a. SRS – Problem Statement, BRD- Business Requirement Document
- b. General Requirement
- c. Requirement as per user Role
- d. System design (RED/Class Diagrams, DFD/Activity diagrams)
- e. User screen design and client side validation
- f. Database Design
- g. User interface design /user manual
- h. Test cases
- i. Scope and limitation
- j. Conclusion
- k. Bibliography

**Major Internship Project (404)**

The student is expected to get exposure of industry through ‘Major Internship Project’. Guidelines about project are as bellow.

1. Student must undergo 60 Days Industrial Internship.

2. Every project will be evaluated by University appointed panel at the end of the semester.

3. Student must report about the progress of project to the internal project guide regularly as specified in time table or if required at a time given by guide.

### **Seminar on Recent Trends in IT: (401)**

Student will select any topic of interest and study it thoroughly throughout the semester. At the end of the semester, student will give a presentation on the topic before the panel appointed by the University and submit the seminar report.

### **XVI. List of Elective Groups:**

<b>Elective Code</b>	<b>Elective Group</b>	<b>Subject Code</b>	<b>Subjects</b>
01	Cloud Computing	A	Virtualization
		B	AWS
02	Data Science	A	Statistical Programming in R
		B	Introduction to Data Science
03	Linux	A	Linux Desktop Environment, Shell Programming and System Administration
		B	Linux Internals and Network Administration
04	Open Source Technologies	A	Perl Scripting
		B	Ruby
05	Mobile Computing	A	Java Script
		B	Android
06	Dot Net Technologies	A	C# Programming and Applications
		B	ASP Dot Net with MVC
07	Net Centric Technologies	A	HTML 5
		B	AJAX Programming
08	Information Systems	A	Recommender System

		B	Knowledge Management
09	IOT	A	IoT Architecture Sensors and Fundamentals with Hands-on lab
		B	Internet Of Things: Sensing And Actuator Devices and Smart city use case
10	Big Data	A	Introduction to Big Data
		B	Business Intelligence Tools With Hadoop
11	Cyber Security	A	Introduction to Information Security
		B	Information Security Threats and Mitigation Strategies
12	Data Management	A	Data Management Environment
		B	Industrial Data Management and Security

**XVII. Bridge Course I:**

This course is designed and compulsory for the students from Non-IT background. The course can be conducted concurrently with semester I courses. The evaluation of this course will be at institute level for 100 marks. The student must score minimum 40 marks to pass this course. There will be no credits assigned to this Bridge Course.

<b>Subject Name</b>	Bridge Course I
<b>No. of Credits</b>	00
<b>Pre Requisite</b>	Basic Mathematics and MSCIT course
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Basic formula for finding areas, volumes, graphical representation of data is to be remembered.
<b>Understanding</b>	Do calculations by using formulas, algorithm, C program structure are to be understood
<b>Applying</b>	Apply basic knowledge of mathematics and computers to write programming codes.
<b>Analyzing</b>	Analyze the problem to represent in proper format such as graphs, trees for effective working
<b>Evaluating</b>	Evaluate the programs or problems for algorithms, logic
<b>Creating</b>	Creating proper program logic so as to reduce lines of codes is expected
<b>Unit</b>	<b>Content</b>
1.	Algorithm ,flow charts, integers, division, relations, relations and their types, representation of relation in computer memory, number conversion systems
2.	Trees, applications of trees, tree traversal algorithms, minimum spanning trees
3.	Fundamentals of C programming, Keywords and Identifiers, Constants, Variables, Data types, Declaration of variables, Declaration of variables as constant, Operators, Types of operators, Input and Output functions - printf(), scanf(), getchar(), putchar(), Formatted input and formatted output.
4.	Control Statements- Sequential, Selection, Iteration Statements, Branching structure- if statement, if-else statement, Nested if-else statement, else if Ladder, Conditional operator, switch statement, Loop control structures- while loop, do-while loop, for loop, Nested for loop, Jump statements-break, continue, goto statements
5.	Function call, return statement, Function parameters, Types of

	functions, Arrays and functions
6.	Introduction to OOP concepts.
<b>Text Books</b>	1.Discrete Structures by Kenneth Rosen 2.C programming by Yashwant Kanetkar 4.Object Oriented Programming by Balguruswamy
<b>Reference Books</b>	C Programming language by Brain W. Kernighan

**Bridge Course II :**

This course is designed and compulsory for the students from Non-Mathematics background and who have not completed mathematics in their 12<sup>th</sup> or graduation course. The course can be conducted concurrently with semester I courses. The evaluation of this course will be at institute level for 100 marks. The student must score minimum 40 marks to pass this course. There will be no credits assigned to this Bridge Course.

<b>Subject Name</b>	Bridge Course II
<b>No. of Credits</b>	00
<b>Course Objective</b>	To prepare background of the student to study courses in MCA
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Remembering basic concepts and their representations
<b>Understanding</b>	Understanding applications of various discrete structures like sets, relations, graphs etc.
<b>Applying</b>	Applying various structures to represent problem data.
<b>Analyzing</b>	Learn to analyze the data for the given problem for representing it using proper structure.
<b>Evaluating</b>	Evaluate the problem for proper discrete structures.
<b>Creating</b>	Design new structures based on basic discrete structures to represent data..
<b>Text Books</b>	Discrete Structures by Kenneth Rosen
<b>Course Plan</b>	
<b>Unit</b>	<b>Content</b>
1.	<b>Set Theory :</b> Definition of a set, Representation of elements of sets, Methods of representing sets , types of sets, operations on sets , cardinality of a set, Principle of Inclusion and Exclusion , Venn Diagram , Proof by using Venn diagram
2.	<b>Functions and Relations :</b> Definition of Function, Types of Functions ,Composite Function, Relation definition, representation of relations
3.	<b>Logic:</b> Propositions, Logic Operations-Negation, Disjunction, Conjunction, Conditional and Biconditional, Truth Tables of compound propositions, Translating English sentences in to logical statements and vice versa, Logic gates and circuits

4.	<b>Matrices:</b> Matrix Definition, General Form, Representation of matrix in computers, Types of matrices, Operations on matrices: Addition, Subtraction and Multiplication, transpose , row / column transformations , Inverse of the matrix by Co-factor and Adjoint method, solutions to three variable problems by using matrices, application problems of matrices
5.	<b>Graphs -</b> Graph terminologies, types of graphs , representation of graph in computers, Paths, Euler and Hamilton graphs, graph colorings.

## **SEMESTER I**

<b>Subject Name</b>	<b>101 Applied Database Management Systems</b>
<b>No. of Credits</b>	4 Credits
<b>Pre Requisite</b>	Basics of Computing and Data Storage
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To teach the fundamentals of the database systems at a master level. A variety of topics will be covered that are important for modern databases in order to prepare the students for real life applications of databases.</li> <li>• To impart knowledge of the concepts related to database and operations on databases. It also gives the idea how database is managed in various environments with emphasis on security measures as implemented in database management systems.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>• Remember the database concepts</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>• Understand the concept of database and techniques for its management</li> <li>• Understand data security standards and methods.</li> <li>• Understand the fundamentals of Distributed Database Systems</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>• Design different data models at conceptual and logical level and translate ER Diagrams to Relational Data Model.</li> <li>• Normalize the database.</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>• Identify and study the file organization schemes for DBMS.</li> <li>• State and Describe features for Concurrency and Recovery.</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>• Convert the relational algebra statements to the SQL statements.</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>• Design the queries using Relational Algebra</li> </ul>
<b>Unit</b>	<b>Content</b>
1	<b>Introduction to DBMS (5 Lectures)</b> Difference between Data, Information, Data Processing & Data Management. File Oriented Approach, Database oriented approach to Data Management, Need for DBMS, Characteristic of Database, Database Architecture: Levels of Abstraction, Database schema and instances, 3 tier architecture of DBMS, Data Independence. Database users, Types of Database System. Database Languages, DBMS interfaces .
2	<b>Data Modeling in Database (7 Lectures)</b> Data Models, Logical Data Modeling : Hierarchical Data Model, Network Data Model, Relational Data Model. Conceptual Data Modeling: Entity Relationship Model, Entities, Attributes, Types of Attributes, Relationships, Relationship set, Degree of relationship Set, Mapping Cardinalities, Keys, ER Diagram Notations, Roles Participation: Total and Partial, Strong and Weak Entity Set. The extended entity relationship (EER) model, Subclass, Superclass, generalization, specialization, Attribute Inheritance. Relational Data Model : Codd's Rules for RDBMS, Translating ER Diagram to Relational Database.
3	<b>Normalization and Relational Algebra: (7 Lectures)</b> Normalization Vs De-Normalization, Decomposition, Lossy and Lossless Decomposition, Functional Dependencies, Normal forms 1NF, 2NF, 3NF, BCNF, Case Studies on Normalization. <b>Relational Algebra:</b> Keys: Composite, Candidate, Primary, Secondary, Foreign, Relational Algebra Operators: Select, Project, Divide, Rename. Set Operations: Union, Intersect, Difference, And Product, Joins: Outer Joins, Inner Joins with example.
4	<b>File Structures and Data Administration: (6 Lectures)</b>

	File Organization, Overview of Physical Storage Media, Magnetic Disk, RAID, Tertiary Storage, Storage Access, Data Dictionary Storage, Organization of File (Sequential, Clustering), Indexing and Hashing, Basic Concepts, indices, B+ Tree index file, B- tree index file, Static hashing, Dynamic Hashing
5	<b>Concurrency Control And Recovery Techniques: (7 Lectures)</b> <b>Concurrency Control:</b> Single User and Multiuser systems, Multiprogramming and Multiprocessing, Basic Database access operations, Concept of transaction, transaction state, ACID properties, Schedules, Serializability of schedules., Concurrency Control, Need for Concurrency control, lock based protocols, timestamp based protocols, Multiple granularity, Multiple Version Techniques, Deadlock and its handling, Wait-Die and Wound-Wait, Deadlock prevention without using timestamps, Deadlock detection and time outs, Starvation <b>Recovery Techniques:</b> Database Recovery, Types of Failures, Storage Structure: Volatile, Non Volatile and stable storage, Data access. Recovery and atomicity, Recovery Techniques / Algorithms: Log Based Recovery, Check points, Shadow Paging.
6	<b>Data Administration And Security: (7 Lectures)</b> Data administration, Role and Responsibility of DBA, Creating/Deleting/Updating table space, Database Monitoring, User Management. Basic data security principles – user privileges, data masking, encryption and decryption. Data Security Implementation, revalidation of user, role, privileges. Data Quality Management, Basic quality principles, data quality audit, data quality improvement
7	<b>Introduction to Distributed Database, NOSQL and MongoDB (6 Lectures)</b> Heterogeneous and Homogeneous Databases, Distributed database features and needs, Advantages and Disadvantages, Distributed Database Architecture. Levels of distribution, transparency, replication. Fragmentation. <ul style="list-style-type: none"> <li>• Introduction to NoSQL – Architecture, Sharding , Replica sets</li> <li>• NoSQL Assumptions and the CAP Theorem</li> <li>• Strengths and weaknesses of NoSQL</li> <li>• MongoDB Functionality Examples</li> </ul>
<b>Text Books</b>	
<b>Reference Books</b>	1. "Fundamentals of Database Systems" Global Edition By <a href="#">RamezElmasri</a> , <a href="#">Shamkant B. Navathe</a> 2. “Database System and Concepts” ASilberschatz, H Korth, S Sudarshan, published by McGraw-Hill. 3. “Practical MongoDB” by Shakuntala Gupta Edward, Navin Sabharwal published by APress. <b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a> , <a href="http://www.coursera.com">www.coursera.com</a>

<b>Subject Name</b>	<b>102. Computer Networks</b>
<b>No. of Credits</b>	4 Credits
<b>Pre Requisite</b>	Knowledge about hardware , network devices and data communication concepts
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of Computer Hardware and Network terminology for development of basic networks in the organization .
<b>Understanding</b>	By remembering students the basic concepts students will understand the concepts of Network topology, network operating systems and how the networks are developed ad per the need of the organization
<b>Applying</b>	Students will Have thorough knowledge about Computer Network and its use for the Information Sharing , device sharing and use of various new network technologies .
<b>Analyzing</b>	Students will acquire a good knowledge of the computer network, its architecture and operation. Student will be able to pursue his study in advanced networking courses (This knowledge will help them to create base for the Network Electives to be studied in the next semesters). Students will be able to follow trends of computer networks. So, students will get exposur to advanced network technologies like MANET, WSN, and 4G.
<b>Evaluating</b>	Ability to select proper method to design the network systems, selecting the proper tool to design the network protect the network from misuse.
<b>Creating</b>	Design and create their own procedure to protect the computer network and use the sharing proper resources .
<b>Unit</b>	<b>Content</b>
1	<b>Introduction to Computer Networks (6 Lectures)</b> Basic concepts of computer hardware and network terminology, What is Computer Network? Network Goals and Motivations, Application of Networks, Network Topologies, Classification of Networks, <b>Network software in brief:</b> Network Protocols, Protocol Hierarchies, Design issues for the Layers, Connection Oriented and Connectionless Services, Service Primitives, Relation of services to Protocols, <b>Network Models:</b> The OSI Reference Model, The TCP/IP Reference Model, Comparison of OSI and TCP/IP Reference Model, A critique of OSI Model, A critique of TCP/IP Model, <b>Examples of some networks:</b> Internet, X.25, ISDN, Frame relay, ATM, Ethernet, Wireless LANs- (wi-fi)
2	<b>Data Transmission and Physical Layer: (7 Lectures)</b> <b>Signals:</b> Analog and Digital Signals, Data Rate, Transmission Impairment, Signal Measurement: Throughput, Propagation Speed and Time, Wavelength, Frequency, Bandwidth, Spectrum <b>Transmission Media&amp; its Characteristics:</b> Guided and Unguided Media, Synchronous and Asynchronous Transmission, Multiplexing: FDM, WDM, TDM, Switching: Circuit, Message and Packet Switching.
3	<b>Unit 3: Network Layer: (7 Lectures)</b> <b>Network Layer Design Issues; Routing Algorithms:</b> Static/ Dynamic , Direct/ Indirect, Shortest Path Routing, Flooding, Distance Vector Routing , Link State Routing, Hierarchical Routing, Broadcast Routing, Multicast Routing, <b>Congestion Control Algorithms:</b> General Principal of Congestion Control, congestion prevention polices, Load shedding, Jitter Control, <b>IP Addressing:</b> IP-Protocol, IP-

	Address Classes (A, B, C, D, E), Broadcast address, Multicast address, Network Mask.
4	<b>Unit 4: Transport and Application Support Protocols (7 Lectures)</b> Transport service, Service Primitives, Internet, and Transport Protocols: TCP/UDP, Remote Procedure Calls, RTP, <b>Session Layer:</b> Token Concept <b>Presentation Layer:</b> Data Encryption and Data Security, Message Authentication,
5	<b>Unit 5 : Advance Networks: (7 Lectures)</b> Concept of 4G Networks, Introduction of 802.16, 802.20, Bluetooth, Infrared, MANET, Sensor Networks. Technical Issues of Advanced Networks, <b>Mobile Ad-hoc Networks:</b> Introductory concepts, Destination-Sequenced Distance Vector protocol, Ad Hoc On-Demand Distance Vector protocol, <b>Wireless Sensor Networks:</b> Sensor networks overview: Introduction, applications, design issues, requirements.
6	<b>Unit 6: Internet Basics (7 Lectures)</b> Concept and Characteristics of Internet , Intranet, Extranet . Structure of Internet through Client Sever . Domain name , Website Development formats for Business Applications. <b>Practical Application on:</b> Domain Name Service, Telnet, FTP, SMTP, SNMP, MIME, POP, IMAP, WWW,HTTP, TCP/IP, LAN, WAN Some basic Operations and commands.
7	<b>Unit 7 : Mobile Network - (7 Lectures)</b> Mobile Telephone Systems: various generations mobile technology , Smart Mobile facilities and Apps on Mobile . Sub netting, Internet control Protocol-ICMP, IGMP, Mobile-IP, IPv6
<b>Text Books</b>	1.A.S. Tanenbaum, <b>Computer Networks</b> (4 <sup>th</sup> ed.), Prentice-Hall of India, Latest Edition 2.W.BehrouzForouzan and S.C. Fegan, <b>Data Communication and Networking</b> , McGraw Hill, Latest Edition 3. William Stalling “Data and Computer Communication”
<b>Reference Books</b>	1. Network Essential Notes GSW MCSE Study Notes 2. Internetworking Technology Handbook CISCO System 3. Introduction to Networking and Data Communications Eugene Blanchard 4. Computer Networks and Internets with Internet Applications Douglas E. Comer. 5. Computer Network in Brief : - <a href="http://www.nripesheschool.com">http://www.nripesheschool.com</a> 6. JyotiBiradar (Patil),Anil Gaikwad “Software Project Management -Made Easy” Lambert Academic Publishing House Dec.2019 .
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses">https://nptel.ac.in/courses</a> , <a href="http://www.freetchbooks.com/computer">http://www.freetchbooks.com/computer</a> network ,In house on <a href="http://www.bharativedyapeeth.edu">www.bharativedyapeeth.edu</a> , Computer Network in Brief : - <a href="http://www.nripesheschool.com/">http://www.nripesheschool.com/</a>

<b>Subject Name</b>	<b>103. Java Programming</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	Any programming Language and Concepts of OOP
<b>Cognitive Abilities</b>	At the end of this course, student should be able to <ul style="list-style-type: none"> <li>• Design interfaces, abstract and concrete classes needed, given a problem specification</li> <li>• Implement classes designed using object oriented programming language</li> <li>• Make them comfort to muse Java API for Input/output and Java Collections and utility classes</li> <li>• Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming</li> </ul>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>▪ Java language Data Types, control structures, OOP concepts,</li> <li>▪ Java API to handle numbers, strings</li> <li>▪ Get knowledge about core Java API ( Wrapper classes; String classes, Math class)</li> <li>▪ Java API hierarchy for Input/output, collections and concurrent programming</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>▪ Understanding how to write, compile and run a Java program.</li> <li>▪ Structure of class and using Inheritance among them.</li> <li>▪ How to create Arrays.</li> <li>▪ Come to know need of inheritance, abstract class and interface and how to use them</li> <li>▪ Get knowledge about core Java API, API hierarchy for Input/output, collections and concurrent programming</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>▪ Design classes and interfaces for given problem statement by making use of OOP concepts.</li> <li>▪ Using proper I/O classes and Collections classes for given problem statement.</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>▪ Analyze a given problem statement to identify classes and relationships among them and making use of Java API efficiently.</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>▪ Given a problem statement; students should able to decide/ best mechanism of class design using is_a or has_a relationships.</li> <li>▪ Read/listen a problem statement and able to decide which I/O classes to be used.</li> <li>▪ Able to debate about when make to use of threads and which collection implementation should be used.</li> </ul>
<b>Creating</b>	Writing Java Applications with use of classes, interfaces and taking advantages of polymorphism.
<b>Unit</b>	<b>Content</b>
1	<b>Introduction to Java (9Lectures)</b> Java Basics: Features of Java, History of Java, Installations of JDK and eclipse as IDE Writing and executing first Java program. Understanding role Java compiler, JVM, Understanding how Java is platform independent and secure. Java data types, variables, operators, expressions, type conversion and casting in Java. Control structures in java: if, if-else and switch statements, using iterative/looping statements in Java: while, do-while and for. Writing functions: Need of functions/methods, Writing and using static method;

	concepts of passing values and returning
2	<b>Class and Object Concepts: (7Lectures)</b> Introduction to Object Oriented concepts, Defining a class, creating objects from class, adding attributes and methods to the class, using constructors, Java naming conventions for class, properties and methods/functions. Passing values to the functions – pass by value, pass by reference, Function overloading. Modifiers – public, private, protected, default, static, final Understanding use of Wrapper classes and Garbage collection in Java
3	<b>Arrays and Strings (6Lectures)</b> One dimensional arrays, Multidimensional arrays, exploring String class and methods, String Buffer class. Packages - creating and accessing a package, importing, packages, creating user defined packages, Concept of package. Introduction to Exception Handling and user defined exceptions.
4	<b>Inheritance and Polymorphism(6Lectures)</b> Concept and importance of inheritance, is-a relationship, types of inheritance, Polymorphism – function overriding, dynamic method dispatch. Overriding methods with throws clause. Using abstract and final keywords with class declaration, Concept of interface, Comparison of Interface and class. Access modifiers and data accessibility in derived classes, method access modifier and method overriding.
5	<b>Concurrent Programming (7Lectures)</b> Concept of threads, lifecycle of threads, creating threads, Thread class, Runnable interface, Thread synchronization, inter thread communication – wait(), notify(), notifyAll() methods .
6	<b>Java Input/Output (7Lectures)</b> Concept of streams, types of streams – byte streams, character streams, The Console: System.out, System.in, and System.err Understanding File class, InputStream class, OutputStream class, FileInputStreams, FileOutputStream, Using character oriented Reader and Writer class, FileReader, FileWriter. Introduction to Buffered streams – DataInput and DataOutput Streams using BufferedReader, BufferedWriter. Making use of Object Streams for Serialization and deserialization
7	<b>Java Collections and Utility Classes(8Lectures)</b> Introductions to generics: generic types and methods Collection Basics- A Collection Hierarchy, Using ArrayList and Vector, LinkedList, making use of Iterator to access collection elements. Set: HashSet, LinkedHashSet, TreeSet , Role of Comparable and Comparator interfaces, Introduction Map: Hashmap, HashTable, TreeMap, LinkedHashMap Understanding bounded types, erasures.
<b>Text Books</b>	Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media;
<b>Reference Books</b>	1. Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007 2. Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008 3. Bruce Eckel , Thinking In Java – Printice Hall, Fourth Edition

<b>Subject Name</b>	<b>104 Computational Statistics</b>
<b>No. of Credits</b>	4 Credits
<b>Pre Requisite</b>	
<b>Course Objectives</b>	<p>.To build a strong foundation for students to become proficient in all Statistics concepts and their Application necessary to become a Data Science Professional.</p> <p>.To provide a conducive environment for understanding, implementing and Prediction on various Historical data.</p> <p>. To keep the students and faculty abreast with the emerging technologies in the field of computer applications.</p> <p>. To bring professionalism amongst the students and promote holistic development.</p>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>Remember the definitions of concepts</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>Understand the concept of Statistics and their methods for its Data Analytics</li> <li>Understand data engineering and standards and methods.</li> <li>Understand the fundamentals of statistics and their Application</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>Data engineering and their concept</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>Identify and study the data for analytics purpose.</li> <li>State and Describe features for Analytics</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>Future Prediction for historical data</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>Write programming of R for Data Analysis</li> </ul>
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction to Statistics (4 Lectures):</b> Meaning of Statistics as a Science, Importance of Statistics Scope of Statistics, Types of data: Primary data, Secondary data, Cross-sectional data, time series data, directional data, classification data and its classification, ungrouped frequency distribution, grouped frequency distribution, cumulative frequency distribution, and relative frequency distribution.
2	<b>Measures of Central Tendency (15 Lectures):</b> Concept of central tendency of statistical data, Statistical averages, characteristics of a good statistical average. Arithmetic Mean (A.M.): Definition, effect of change of origin and scale, combined mean of a number of groups, merits and demerits, trimmed arithmetic mean. Mode and Median: Definition, formulae (for ungrouped and grouped data), merits and demerits, Quartiles, Deciles and Percentiles (for ungrouped and grouped data), Geometric Mean (G.M.): Definition, formula, merits and demerits. Harmonic Mean (H.M.): Definition. Formula, merits and demerits. mean Weighted Mean: weighted A.M., G.M. and H.M. Measures of Dispersion :Concept of dispersion, characteristics of good measure of dispersion. Range, Quartile deviation Mean deviation: Definition, merits and demerits, Variance and standard deviation
3	<b>Moments, Skewness and Kurtosis (6 Lectures) :</b> Concept of Raw and central moments, Formulae for ungrouped and grouped data (only first four moments), relation between central and raw moments upto fourth order. (without proof), Measures of Skewness, Types of skewness, Pearson's and Bowley's coefficient of skewness, Measure of skewness based on moments,

	Measure of Kurtosis: Types of kurtosis, Measure of kurtosis based on moments
4	<b>Correlation (5Lectures):</b> Bivariate data, Scatter diagram and interpretation., Concept of correlation between two variables, positive correlation, negative correlation, no correlation. variance between two variables , Karl Pearson's coefficient of correlation (r) , Spearman's rank correlation coefficient, compute Karl Pearson's correlation coefficient between ranks
5	<b>Regression (5Lectures)</b> Meaning of regression, difference between correlation and regression, Concept of error in regression, error modeled as a continuous random variable. Simple linear regression model Estimation of a, b by the method of least squares. Interpretation of parameters.
6	<b>Time Series (5Lectures)</b> Meaning and utility , Components of time series , Additive and multiplicative models , Methods of estimating trend : moving average method, least squares method and exponential smoothing method(with graph and interpretation)
7	<b>Introduction to R Programming (15Lectures)</b> Concept of R, Installation of R, Data Types , Vector, List, Frame, Array, Matrix, Statistics Commands, Base graphics, Data manipulation with data table ,concept of cluster, Concept of Prediction Model ,Analysis of Real world Problem
<b>Text Books</b>	
<b>Reference Books</b>	1.Fundamental of Statistics by S.C.Gupta 2. Freedman, David, Robert Pisani, & Roger Pervis(2007). <i>Statistics</i> .New York: W. W. Norton. 3.James, Gareth, Daniela Witten, Trevor Hastie, & Robert Tibshirani(2013). <i>An Introduction to Statistical Learning: With Applications in R</i> . <b>Subject Name</b>	<b>105. Management Concepts and Applications</b>
<b>No. of Credits</b>	4Credits
<b>Pre Requisite</b>	General awareness about the organization and atomization used
<b>Remembering</b>	Students are expected to recalling day to day management concepts that are unknowingly applied in real life situations
<b>Understanding</b>	Gathering information about management ,its origin and the contributions of some of the management gurus is achieved .
<b>Applying</b>	Students will learn implementation of management functions in real life cases so as to justify decision being taken and through ERPs availability
<b>Analyzing</b>	Students will learn fact finding in a situation using the objectives of each functions' achievement and its effective utilisation in e commerce environment
<b>Evaluating</b>	Generating or creating the ability amongst the students in fact finding techniques and evaluating the actual performance with the planned.
<b>Creating</b>	Students are expected to capture the new cases in real life situation and create a solution in the form of model so as to resolve the problem such as ERPs
<b>Unit</b>	<b>Contents</b>
1	<b>Management (9 Lectures)</b> Definition and Meaning ,Nature and purpose ,Evolution of Management thoughts, Contributions of F.W Taylor ,Contributions of Henry Fayol, Human relations approach, System approach to management, Skills and Functions of a manager
2	<b>Planning (9 Lectures)</b> Definition and Importance ,Types of Plans, Types of Planning , Steps in Planning ,Limitations of Planning ,Planning Premises, Management by Objectives (MBO):Concept, Objective setting Process, Benefits and Weaknesses, concept of software project planning (9)
3	<b>Organization (9 Lectures)</b> Definition ,nature of organizing, importance , process of organizing ,organization chart ,structure of IT organization , New Organisational Designs – Project, Matrix, Organic Structure & Mechanistic Structure Challenge of Modern Organisation, Virtual Organisation,Case study (7)
4	<b>Staffing (8 Lectures)</b> Nature & Significance, A brief knowledge of Recruitment, Selection, Training & Development, Performance Appraisal in IT organisation. Case study (8)
5	<b>Directing and Controlling (15 Lectures)</b> Nature, Concept of Leadership, Leadership Styles, Theories of Leadership, Charismatic Leadership Theory, Role of Software Team Leader, case study , Concept and Importance of Control, Control Process, Types of Control Mechanism, Responsibility and authority , Management by Exceptions, case study.
6	<b>Decision making (6 Lectures)</b> Decision making and its process, Decision making conditions , need of computer based decision making , decision support system, expert system.
7	<b>Introduction to E-commerce (6 Lectures)</b> E commerce types,E commerce spread in recent years ,E commerce

	importance ,Security measures under E commerce, introduction to Enterprise Resource Planning (ERP) ,ERP advantages, Introduction to SAP
<b>Text Books</b>	1.Principles of Management by L M Prasad, Sultan Chand Publications 2.E – Commerce: Strategy, Technologies and Applications” by David Whiteley
<b>Reference Books</b>	1. Principles of management by TRamaswamy , Himalaya Publications 2. Principals of Management by Tripathi and Ready, 3. New Era of Management by Richard Daft ,South Western Sangage Learning 4.Management Principles and Practices by Lallan Prasad and SS Gulshan. Publications :Excel Books India. 5.Decision Support System , Janaki Raman ,PHI publications

<b>Subject Name</b>	<b>106 Lab on Applied Database Management Systems</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Concept of Database Management Systems, Familiarity with data processing concepts and applications.
<b>Course Objective</b>	<ul style="list-style-type: none"> <li>To practice the application of the concepts related to database its techniques and Operations.</li> <li>SQL (Structured Query Language) is introduced in this subject.This helps to create strong foundation for application of database design.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Make use of different operators as per the questions
<b>Understanding</b>	Understand the theoretical and physical aspect of a relational database.
<b>Applying</b>	Implementation of RDBMS concepts through Oracle.
<b>Analyzing</b>	Observe the performance of the query with different data sets.
<b>Evaluating</b>	Test the results obtained from the different queries, PL/SQL blocks, functions
<b>Creating</b>	Construct Simple and complex queries on sample datasets Writing PL/SQL blocks
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction to Oracle and SQL (8 Lectures)</b> History, Features, Versions of Oracle, Database Structure: Logical Structure and Physical Structure, Oracle Architecture: System Global Area Processes: Server Processes, Background Processes, Tools of Oracle: SQL * Plus, PL/SQL, Forms, Reports, Pre Compilers:SQL Loader, Import, Export. <b>Introduction to SQL</b> Keywords, Delimiters, Literals, Data Types, Components of SQL: <b>DDL Commands</b> – Defining a database in SQL, Creating table, changing table definition, removing table, Creating Tables with constraints on row level and column level, primary key, foreign key, check. Altering Constraints. <b>DML Commands</b> - Inserting, updating, deleting data, <b>DQL Commands</b> : Select Statement with all options. Renaming table, Describe Command, Distinct Clause, Sorting Data in a Table, Creating table from a table, Inserting data from other table, Table alias, and Column alias. <b>DCL commands</b> - Granting and Revoking Permissions
2	<b>Operators and Functions (5 Lectures)</b> <b>Operators</b> :Arithmetic, Logical, Relational, Range Searching, Pattern Matching, IN & NOT IN Predicate, all, % any, exists, not exists clauses, Set Operations: Union, Union All, Minus, Intersect, Grouping data. <b>Functions</b> :Aggregate Functions, Numeric Functions, String Functions, Date Functions, Conversion Functions, MiscellaneousSub queries <b>Joins</b> :Relating data through join concept. Simple join, equi join, non equi join, Self join, Outer join
3	<b>Database Objects (5 Lectures)</b> <b>Views</b> :Introduction, Creating a View, Selecting data from a view, Updateable views, Views on multiple tables, Destroying a View. <b>Sequences</b> :Introduction, Creating a Sequence, Altering a Sequence, Referencing a Sequence, Dropping a Sequence. <b>Index</b> :Introduction, Creating Index, Simple Index, Unique Index, Reverse Key Index, Dropping Index.
4	<b>Introduction To PL/SQL (5 Lectures)</b> Introduction, Advantages, PL/SQL Block, PL/SQL Execution Environment, PL/SQL

	Character set, Literals, Data types, PL/SQL Block: Attributes %type, %rowtype, Variables, Constants, Displaying User Message on screen, Conditional Control in PL/SQL, Iterative Control Structure: While Loop, For Loop, Goto Statement, Commit, Rollback, Savepoint
5	<b>Cursor Management and Triggers (5 Lectures)</b> <b>Cursor:</b> Explicit & Implicit Cursor, Declaring Cursor Variables, Constrained & Unconstrained Cursor Variables, Opening Cursor, Fetching Cursor into Variables, Closing Cursor, Cursor For Loops, Parametric Cursors. <b>Triggers:</b> Definition, Syntax, Parts of triggers: statement, body, restricted, Types of triggers: Enabling & disabling triggers.
6	<b>Stored Procedures / Functions and Exception Handling (5 Lectures)</b> Introduction, How oracle executes procedures/ functions, Advantages, How to create Procedures & Functions, Examples. <b>Error Handling in PL/SQL:</b> Exception Handling & Oracle Engine, Oracles Named Exception Handlers, User Named Exception Handlers.
7	<b>MongoDB (7 Lectures)</b> Installation of MongoDB, Checking Shell, Creating Users and Enabling Authorization, Basic Querying Using Shell, sorting, indexing – single indexing and compound indexing, Using Conditional Operators in queries
<b>Text Books</b>	References (Books, Websites etc.): 1. Ivan Bayross SQL, PL/SQL The Programming Language of Oracle 3rd Revised Edition BPB Publications 2. “Practical MongoDB” by Shakuntala Gupta Edward, Navin Sabharwal by APress.
<b>Reference Books</b>	<b>Suggested MOOC :</b> Please refer these websites for MOOCs: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> ; <a href="http://www.coursera.com">www.coursera.com</a>

<b>Subject Name</b>	<b>107 Lab on Java Programming</b>
<b>No of Credits</b>	<b>3 Credits</b>
<b>Course Objective</b>	This is companion course of Object Oriented Programming Practical aspects of OOP towards problem solving is covered.
<b>Prerequisite</b>	<b>Theoretical Knowledge of Java Programming</b>
<b>Course Outcome</b>	<p>The students will develop adequate programming skills with respect to following</p> <ul style="list-style-type: none"> <li>• Write simple programs to use basic programming language constructs</li> <li>• Design interfaces, abstract and concrete classes needed, given a problem specification</li> <li>• Implement classes designed using object oriented programming language</li> <li>• Learn how to test, verify, and debug object-oriented programs and create programs using</li> <li>• Make them comfort to use Java API for Input/output and Java Collections and utility classes</li> <li>• Able to achieve object persistence using object serialization and write modules to take advantages of concurrent programming</li> </ul>
<b>Unit No</b>	<b>Programming Exercises</b>
<b>1</b>	<p><b>Introduction to Java</b>  Writing, compiling and Executing Java programs using basic language constructs as bellow</p> <ul style="list-style-type: none"> <li>- Using Operators : arithmetic, relational, logical and bitwise</li> <li>- Control structures (if, if-else, switch)</li> <li>- Iterative statements (while, do-while, for)</li> </ul>
<b>2</b>	<p><b>Class and Object Concepts</b></p> <ul style="list-style-type: none"> <li>- Writing a class, creating objects and using it</li> <li>- Using constructors to initialize object</li> <li>- Programs to demonstrate parameter passing</li> <li>- Making use of access modifiers</li> </ul>
<b>3</b>	<p><b>Arrays and Strings</b></p> <ul style="list-style-type: none"> <li>- Programs to work with single dimensional and multidimensional arrays</li> <li>- Searching and sorting</li> <li>- Programming with string and operations on it</li> <li>- Programs to understand and study string literal pool</li> </ul>
<b>4</b>	<p><b>Inheritance and Polymorphism</b></p> <ul style="list-style-type: none"> <li>- Defining classes as generic types ; using it to write new class/classes</li> <li>- Need and example of method overriding</li> <li>- Writing abstract class and interface</li> <li>- Using abstract classes to write concrete classes</li> <li>- Using interface as base type to write new interface and implementing it to write new concrete class/classes</li> <li>- Anonymous and inner classes</li> </ul>
<b>5</b>	<p><b>Concurrent Programming</b></p> <ul style="list-style-type: none"> <li>- Designing and using Thread class and Runnable interface</li> </ul>

	<ul style="list-style-type: none"> <li>- Thread synchronization</li> <li>- Program to demonstrate Thread priorities, thread join and making use of yield</li> <li>- Programs with classes making use of thread and inter communication between them.</li> </ul>
<b>6</b>	<b>Java Input/Output</b> <ul style="list-style-type: none"> <li>- Programs to make using InputStream and OutputStream classes.</li> <li>- Reading and Writing data into files</li> <li>- Making use to console to read data.</li> <li>- Using readers and writers to write data into Files</li> <li>- Making use of Buffered Streams and reader and writer</li> <li>- Programs to take advantages of serialization</li> </ul>
<b>7</b>	<b>Java Collections and Utility Classes</b> <ul style="list-style-type: none"> <li>- Programs to make use collections (ArrayList, Vector, Set and Maps)</li> <li>- Writing user defined generic data types types</li> <li>- Programs to illustrate bounded types and erasures</li> </ul>
<b>Reference Books :</b>	<ol style="list-style-type: none"> <li>1. Herbert Schildt, Java: The Complete Reference, McGraw-Hill Osborne Media; Seventh Edition, 2007</li> <li>2. Cay S. Horstmann and Gary Cornell ,Core Java-Volume-I, Sun Core Series, Eighth Edition, 2008</li> <li>3. Bruce Eckel ,Thinking In Java – Printice Hall, Fourth Edition</li> </ol>

The outline provided above provides the types of computational problems are expected to be given to students. List of the example assignment is provided here; these assignments are just examples and it is not limited to this only.

<b>Subject Name</b>	<b>109 Universal Human Values</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>To help the student to see the need for developing a holistic perspective of life.</li> <li>To sensitize the student about the scope of life – individual, family, society and nature/existence.</li> <li>Strengthening self-reflection.</li> <li>To develop more confidence and commitment to understand, learn and act accordingly.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcomes</b>
<b>Remembering</b>	To provide an overview of Prerequisites to Human Values
<b>Understanding</b>	Understand the role of a human being in ensuring harmony in self and society
<b>Applying</b>	To actualize a harmonious environment wherever they work
<b>Analyzing</b>	To analysing ethical dilemma while discharging duties in professional life
<b>Evaluating</b>	To evaluate ethical and unethical decisions and take a right stand
<b>Creating</b>	To develop a harmonious environment for holistic development of self and body
<b>Syllabus</b>	
<b>1</b>	<b>Introduction to Value Education&amp; Harmony in Human Being</b> <ol style="list-style-type: none"> <li>Value Education, Definition, Concept and Need for Value Education.</li> </ol> Self exploration as a means of Value Education.
<b>2</b>	<b>Harmony in the Human Being</b> <ol style="list-style-type: none"> <li>Human Being is more than just the Body.</li> <li>Harmony of the Self ('I') with the Body - happiness and physical facility</li> <li>Understanding Myself as Co-existence of the Self and the Body.</li> <li>Understanding Needs of the Self and the needs of the Body.</li> </ol> Understanding the activities in the Self and the activities in the Body
<b>3</b>	<b>Harmony in the Family and Society and Harmony in the Nature</b> <ol style="list-style-type: none"> <li>Family as a basic unit of Human Interaction and Values in Relationships.</li> <li>The Basics for Respect and today's Crisis: Affection, e, Guidance, Reverence, Glory, Gratitude, Prosperity and Love.</li> <li>Comprehensive Human Goal: The Five Dimensions of Human Endeavour.</li> <li>Harmony in Nature: The Four Orders in Nature.</li> <li>The Holistic Perception of Harmony in Existence.</li> </ol>
<b>4</b>	<b>Professional Ethics</b> <ol style="list-style-type: none"> <li>Value based Life and Profession.</li> <li>Professional Ethics and Right Understanding.</li> <li>Competence in Professional Ethics.</li> </ol> Issues in Professional Ethics – The Current Scenario.

<b>Reference Books</b>	<ul style="list-style-type: none"> <li>• Human Society in Ethics &amp; Politics by Bertrand Russell publisher Taylor and Francis 2015 reprint</li> <li>• Ethical Philosophy of India by I.C. Sharma publisher Johnsen 1965</li> </ul>
<b>OnlineResources:</b>	<ul style="list-style-type: none"> <li>• <a href="https://fdp-si.aicte-india.org/verifiedProgramDetailsList.php">https://fdp-si.aicte-india.org/verifiedProgramDetailsList.php</a></li> <li>• <a href="https://citizenchoice.in/course/Universal-Human-Values/Unit%201/Happiness-and-Prosperity">https://citizenchoice.in/course/Universal-Human-Values/Unit%201/Happiness-and-Prosperity</a></li> </ul>
<b>MOOCs:</b>	<p>Swayam.gov.in</p> <p><a href="https://epgp.inflibnet.ac.in">https://epgp.inflibnet.ac.in</a></p>

<b>Subject Name</b>	<b>109 Soft Skills</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>To familiarise students about the various soft skills</li> <li>To boost students' communication and presentation skills</li> </ul>
<b>Course Outcomes</b>	<ul style="list-style-type: none"> <li>Development of Critical and reflective thinking;</li> <li>Self-management and self awareness skills amongst the students</li> </ul>
1	<b>Introduction to Soft Skills</b> Introduction ,the objectives of soft skills development , Integral Parts of Soft Skills ,Outcomes of Soft Skills Development ,Personal Developmental Plan (PDP), self awareness
2	<b>Communication Skills</b> Definition, Nature and Scope of Communication ,Importance and Purpose of Communication, Process of Communication ,Types of Communication, Aspects of communication skills ,verbal and non verbal communication skills, Essentials of Effective Communication
3	<b>Presentation Skills</b> Objectives , Types of presentations, factors to be considered while preparing presentation , creating a Presentation, delivering a Presentation, attending a Presentation , body Language and etiquettes
4	<b>Time Management Skills</b> Need, objectives, time management techniques , benefits of time management , factors to be considered -delegation of task, prioritise work,creating schedule,set up deadline,Overcome Procrastination,dealing with stress, avoiding multitasking,start early etc.
<b>Reference Books</b>	1.Soft Skills 3rd Edition: Personality Development for Life Success By Prashant Sharma , BPB publications 2Time Management: The Brian Tracy Success Library by Brian Tracy

<b>Subject Name</b>	<b>109 Cyber Security</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	
<b>Course Objectives:</b>	<ul style="list-style-type: none"> <li>• To understand different types of threats .</li> <li>• To know the ways of different cyber attack being adopted .</li> <li>• To recognize types of viruses such as malware, virus, hacking and cracking activities.</li> </ul>
<b>Course Outcomes:</b>	<ul style="list-style-type: none"> <li>• To understand techniques of encryption .</li> <li>• To understand the term Cryptography and its importance in computer forensics and cyber security</li> </ul> <p>To identify Cyber Crime and the action thereof .</p>
1	<b>CyberSecurity</b> Meaning of Cyber security ,meaning of Cyber Crimes, ways of achieving Cyber Security, IT Act, Computer Ethics and Security Policies, Guidelines to choose web browsers, Guidelines for setting up a Secure password, Online Banking Security, Mobile Banking Security ,Web Application Security, Digital Infrastructure Security
2	<b>Information Security-</b> Threat to business continuity due to accidents related to information systems, Cyberspace, Information assets, Vulnerabilities ,Information security measures, Threats such as Unauthorized intrusion, Unauthorized access, Eaves dropping , Spoofing ,Alteration , Cracking.
3	<b>Kinds of Cyber-attack</b> Information leakage, DoS attack, Rumor, Flaming, SPAM e-mail , Computer virus ,Macro virus, Worm, Bot (botnet, remote operated virus), Trojan horse, Spyware, Ransomware, Key logger, Root kit, Backdoor, Fake anti-virus software
4	<b>Cryptography-</b> <b>Meaning of cryptography</b> , encryption , decryption ,Symmetric cryptography , Public key cryptography
Reference Books	1.Fundamentals of Cyber Security by BhushanMayank , BPB Publications  2. Foundations of Information Security :A Straight forward Introduction by Jason Andress

## SEMESTER II

<b>Subject Name</b>	<b>201. Object Oriented Software Engineering</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	Programming skills, Database Concepts.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Should be able to remember various steps carried out in development of software.
<b>Understanding</b>	Should be able to understand requirements of the user.
<b>Applying</b>	Should be able to apply object oriented concepts and UML diagrams to the defined problem.
<b>Analyzing</b>	Should be able to analyze requirements of the user and convert to functionalities of the software.
<b>Evaluating</b>	Should be able to Evaluate design of the existing software.
<b>Creating</b>	Should be able to de Design their own software.
<b>Unit</b>	<b>Contents</b>
<b>1</b>	<b>Software and Software Engineering ( 5 Lectures )</b> The nature of software, Software Engineering Concept, SDLC, Process Models: Waterfall Model, V Model, Prototyping Model, Spiral Model, RAD (Rapid Action Development) Model
<b>2</b>	<b>Object Oriented Concepts, Modeling and UML( 5 Lectures )</b> 2.1 What is Object Orientation? (Introduction to class, object, inheritance, polymorphism) 2.2 Modeling 2.2.1 Introduction of Modeling 2.2.2 Object Oriented Modeling 2.3 UML (Unified Modelling Language) 2.3.1 History of UML 2.3.2 UML Diagrams 2.4 Iterative Development with RUP and Phases of RUP
<b>3</b>	<b>Requirement Understanding and Requirement Modelling with Use Case Diagram ( 5Lectures)</b> 3.1 Requirement Engineering 3.2 Requirement Elicitation 3.3 Developing Use Cases 3.4 Use Case Diagram 3.4.1 Realization of Use Cases 3.4.2 Finding Actors 3.4.3 Defining Relations among Use case 3.4.4 Writing Use Cases 3.5 Activity Diagram
<b>4</b>	<b>Basic and Advanced Structural Modeling (10 Lectures)</b> 4.1 Class Diagram 4.1.1 Identifying the elements of an object model 4.1.1 Identifying classes and objects 4.1.2 Specifying the attributes 4.1.3 Defining operations 4.1.4 Finalizing the object definition 4.1.5 Advanced class Modelling 4.1.6 Interface, Types and Roles 4.2 State Chart Diagram 4.3 Package Diagram

	4.4 Object Diagram
5	<b>Interaction Modelling (5 lectures )</b> 5.1 Introduction to Interaction Diagrams 5.2 Need of Interaction Diagrams 5.3 Interaction Diagrams 5.3.1 Collaboration Diagram 5.3.2 Sequence Diagram
6	<b>Architectural Modeling ( 5 Lectures )</b> 6.1 Component Diagram 6.1.1 Need of Component Diagram 6.1.2 Realization of Components 6.1.3 Relating Components 6.2 Deployment Diagram 6.2.1 Software Architecture 6.2.2 Architectural Styles 6.2.3 Representing Architecture using Deployment Diagram
7	<b>Case Studies (10 Lectures)</b> 7.4 Discussion on following case Studies- a. Library Management System b. Hospital Management System c. Online Shopping d. Nukari.com website e. Matrimonial website
<b>Text Books</b>	1. Software Engineering by Pressman Publisher BPB
<b>Reference Books</b>	1. The Unified Modeling Language User Guide by Grady Booch, James Raumbaugh, Ivar Jacobson. Publisher Addison-Wesley Professional 2. Object Oriented Software Engineering Use case driven approach by Ivar Jacobson Publisher Pearson 3. UML Distilled by Martin Fowler Publisher Addison-Wesley Professional 4. UML Toolkit 2 by Hans-Erik Eriksson Publisher Wiley.

<b>Subject Name</b>	<b>202. Cloud Computing Concepts</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	1. Knowledge of Web technologies 2. Knowledge of Web services and multimedia 3. Knowledge of DBMS
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	How to provide Flexible and scalable infrastructures
<b>Understanding</b>	Increased availability of high-performance applications to small/ medium-sized businesses
<b>Applying</b>	Reduces implementation and maintenance costs
<b>Analyzing</b>	The case studies will help us to understand more of practice of cloud computing in the market.
<b>Evaluating</b>	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
<b>Creating</b>	Creating flexible and scalable infrastructure suitable to the organizational need
<b>Unit</b>	<b>Contents</b>
1	<b>Cloud Computing Fundamentals (10 Lectures)</b> Definition of Cloud Computing, private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public Vs private clouds
2	<b>Virtualization And Cloud Computing (7 Lectures)</b> Role of virtualization in enabling the cloud; Business Agility: Benefits and challenges to Cloud architecture. Application availability, performance, security and disaster recovery; next generation Cloud Applications, Visualizing Virtualization, Managing Virtualization, Taking Virtualization into the Cloud
3	<b>Service Oriented Architecture And The Cloud (7 Lectures)</b> Defining Service Oriented Architecture, Understanding the Coupling, Implementation of Service Oriented Architecture (SOA), Understanding Services in the Cloud, Serving the Business with SOA and Cloud Computing.
4	<b>Cloud Applications (7 Lectures)</b> Technologies and the processes required when deploying web services; Deploying a web service from inside and outside a cloud architecture, advantages and disadvantages.
5	<b>Management Of Cloud Services (7 Lectures)</b> Reliability, availability and security of services deployed from the cloud. Performance and scalability of services, tools and technologies used to manage cloud services deployment; Cloud Economics: Cloud Computing infrastructures available for implementing cloud based services. Economics of choosing a Cloud platform for an organization, based on application requirements, economic constraints and business needs (e.g Amazon, Microsoft and Google, Salesforce.com, Ubuntu and Redhat)
6	<b>Application Development (7 Lectures)</b> Service creation environments to develop cloud based applications. Development environments for service development; Amazon, Azure, Google App.
7	<b>Cloud It Model (7 Lectures)</b> Analysis of Case Studies when deciding to adopt cloud computing architecture. How to decide if the cloud is right for your requirements. Cloud based service, applications and development platform deployment so as to improve the total cost of ownership (TCO)
<b>Text Books</b>	1. Cloud Computing: Principles and Paradigms by Rajkumar Buyya, James Broberg

	<p>and Andrzej M.Goscinski, Wiley, 2011.</p> <p>2. Distributed &amp; Cloud computing, Kai Hwang, GeofferyC.Fox,jack Elsevierm,2012</p> <p>3. Cloud Computing implementation,management and security by John W.Rittinghouse,James E Ransome,CRCPress,Taylor&amp; Francis group,2010</p> <p>4. Cloud Computing a practical approach by Anthony T.Velte,TobyJ.Velte Robert Elsenpeter,Tata Mc Graaw Hill edition,2010</p>
<b>Reference Books</b>	<p>1. Cloud Application Architecture by George Reese,Oreillypublishers</p> <p>2. Cloud computing and SOA convergence in your enterprise,byDavidS.Linthicum,Addison- Wesley</p>

<b>Subject Name</b>	<b>203. Data Structures and Algorithms using Python</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	School Level Mathematics. It does not assume any prior knowledge of programming.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some motivating examples to remember and quickly builds up basic concepts such as conditionals, loops, functions, lists, strings and tuples.
<b>Understanding</b>	Students will get acquainted built in data structures in python, understand features and programming constructs of python language. During this course, they will understand main control structures of procedural programming languages. understand the complexity of various algorithms
<b>Applying</b>	They will make of function to reduce problem into small modules, To familiarize with exceptions and mechanism to handle it , make use of python to read and write data into files, implement ADT for various user defined data structures, implement data structures like: Stack, Queue, Link List, Tree.
<b>Analyzing</b>	Compare efficiency of various data structures for solving a particular problem. Analyzing performance of a algorithm.
<b>Evaluating</b>	Ability to choose appropriate data structures for problem solving Ability to use combination of these data structures for problem solving. Evaluating the performance of various Algorithms and Data Structures.
<b>Creating</b>	Design and create their own data structure for solving a real life problem
<b>Unit</b>	<b>Contents</b>
1	<b>Basics of Python (6 Lectures)</b> Python Installation, writing and executing first python script, using python editors to write and execute python scripts <b>Identifiers and Operators:</b> Writing get familiar with python variables and data types, variables and assignments, Operator understanding and its usage, <b>Python Control structures in Python:</b> Conditionals and Loops: if statement, else Statement, el-if Statement, while Statement, for Statement, break Statement, continue Statement, pass Statement, Arrays Working strings in python: String type, strings concatenations and comparing strings, using string functions
2	<b>Working with functions and Built in data structures Functions (6 Lectures)</b> Writing a simple function and using it, functions and parameters, functions retuning values, functions and variable scope, Variable number of arguments, passing objects and collections in function, understanding recursive functions, writing and using recursive functions. Variable number of arguments to functions <b>Python data Structures:</b> List: Crating and using list and tuples. Operations on list and tuples, Special

	Features of Lists and tuples, introduction to List comprehensions Dictionaries: Introduction to Dictionaries, Operators, Built-in Functions, Built-in Methods, Dictionary Keys, Using Set data structure
3	<b>Handling Exceptions and File Input/Output (8 Lectures)</b> Need of exception Handling, Simple mechanism to handle exception, Using if exceptions to handle the code cracks, Using else clause while handling exceptions, Handling generic and specific exceptions, handling multiple exceptions, Raising exception, File Objects, creating a file object, reading File contents, Writing data into file, reading and writing CSV files, using with clause, Using Exception handling with file operations
4	<b>Introduction ADT (9 Lectures)</b> Writing a simple Class in Python, creating object of class, Instance Methods, Class Variables and special methods. Understanding ADT, Defining ADT using pseudo-code, Defining ADT for Date, Stack and Queue, Implementation of Date, Stack and Queue ADT. Concepts of circular and double ended queue. Applications of Stack and Queue
5	<b>Linked Lists (8 Lectures)</b> Defining List as ADT, Implementation of Singly Linked Lists, Circularly Linked Lists, Doubly Linked Lists, The Positional List ADT, Sorting a Positional List, Link-Based vs Array-Based Sequences.  Implementation of Stack and Queue using Link List. Applications of Linked List (polynomial Equations)
6	<b>Trees (9 Lectures)</b> Concepts of tress and Binary Trees, Defining binary tree as ADT, Implementing Binary Trees, Tree Traversal Algorithms  <b>Search Trees:</b> Binary Search Trees ,Balanced Search Trees ,Python Framework for Balancing Search Trees ,AVL Trees ,Splay Trees, Red-Black Trees  <b>Heaps, Maps, Hash Tables, and Skip Lists</b>
7	<b>Searching , Sorting and Analysis of Algorithms (9 Lectures)</b> Need of searching, linear search, using binary search for efficient search. Need of sorting and various sorting algorithms: insertion sort, bubble sort, selection sort; Merge sort and quick sort algorithms. Python's Built-In Sorting Functions, Selection Algorithms. Analysis of Algorithms: Measuring Algorithm Efficiency, Asymptotic Analysis, The Big-O Notation, Find the complexity of Algorithms: Linear Search, Binary Search, Sorting Algorithms. Compare complexity of various searching and sorting Algorithms
<b>Text Books</b>	Data Structures and Algorithms in Python Paperback – 2016 by Michael T. Goodrich (Author), Roberto Tamassia (Author), Michael H. Goldwasser (Author) WILEY PUBLICATION  Data Structure and Algorithmic Thinking with Python Paperback – 2015 by NarasimhaKarumanchi (Author)
<b>Reference Books</b>	Problem Solving in Data Structures & Algorithms Using Python: Programming Interview Guideby Hemant Jain
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/106/106106145/#">https://nptel.ac.in/courses/106/106/106106145/#</a>

<b>Subject Name</b>	<b>204. Data Warehousing and Data Mining</b>
<b>No. of Credits</b>	4 Credits
<b>Pre Requisite</b>	Thorough understanding of Relational database normalization techniques , Physical design of a database, Concepts of algorithm design and analysis, Basic understanding of: Software engineering principles and techniques, Probability and statistics
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>This course will enable to expose the students to Study various design and implementation issues and techniques in data warehousing and data mining.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Remembering the fundamentals of Database technology and its application in data warehousing and data mining.
<b>Creating</b>	Creating multi dimensional data models using star, snowflake and fact constellation schemas.
<b>Understanding</b>	Understand the components, architecture and other important tools of data warehousing and data mining.
<b>Applying</b>	Apply the techniques of clustering, classification, association and other data mining algorithms to real world data.
<b>Analyzing</b>	Gather and analyze large sets of data to gain useful information using data mining techniques.
<b>Evaluating</b>	Producing and interpreting quantitative analysis using various data mining algorithms.
<b>Unit</b>	<b>Contents</b>
1	<b>Business Intelligence (5 Lectures)</b> Business Environment and Computerized Decision Support, Managerial Decision Making, Computerized support for Decision Making, Decision Support System, Early Framework for Computerized Decision Support, Business Intelligence, Importance of BI, BI for Decision makers, The BI process, A framework for Business Intelligence
2	<b>Data warehousing (10 Lectures)</b> OLTP and OLAP Systems, Introduction to Data Warehouse, Differences between OLTP Systems and Data Warehouse, Characteristics of Data Warehouse; Advantages of Data Warehouse; Data Warehouse Users, Metadata, Classification of Metadata, and Importance of Metadata. Data Marts, Reasons for creating Data Marts, Building Data Marts: Top down Approach & Bottom up Approach, Data Warehouse Architecture, Two tier Architecture, Three Tier Architecture. Data Warehouse Schema, Star, Snow Flake & Fact Constellation Schema. OLAP Operations, OLAP Models.
3	<b>Data Preprocessing (5 Lectures)</b> Need, Objectives and Techniques of data preprocessing. <b>Descriptive Data Summarization:</b> Measuring the Central Tendency, Measuring the Dispersion of Data, Graphic Displays of Basic Descriptive Data Summaries <b>Data Cleaning:</b> Handling of Missing values and Noisy Data, Data cleaning as a process <b>Data Integration and Transformation:</b> Data Integration: Schema integration, Controlling redundancies using correlation. Data Transformation: Smoothing, Aggregation, Generalization, Attribute construction, Normalization <b>Data Reduction:</b> Data Cube Aggregation; Attribute Subset Selection, Dimensionality Reduction, Numerosity Reduction, Discretization & Concept

	Hierarchy Generation for Numerical Data and for Categorical Data.
4	<b>Introduction Data Mining (5 Lectures)</b> Evolution of database system technology, introduction to data mining, architecture of a typical data mining system, Types of data that can be mined, Data Mining Functionalities, Classification of Data Mining systems, Data Mining Task Primitives, Integration of a Data Mining System with a Database or a Data Warehouse System, Major issues in Data Mining.
5	<b>Mining Association Rules (5 Lectures)</b> Introduction, Market Basket Analysis, Multi-Level and single level Mining, Mining Association Rules on Transactional database, Multi-Dimensional Association Rules From Relational Databases & Data Warehouses, From Association Mining To Correlation Analysis, Constraint Based Association Mining, Association Rule mining using Apriori Algorithm, and FP Growth algorithm. Generalized association rule.
6	<b>Classification &amp; Prediction (5 Lectures)</b> Introduction to Classification and Prediction; Basics of Supervised & Unsupervised Learning; Preparing the Data for Classification and Prediction; Comparing Classification and Prediction Methods, Classification by Decision Tree Induction, Tree Pruning, Rule-based Classification Using IF-THEN Rules for Classification; Rule Extraction from a Decision Trees; Bayesian Classification: Bayes' Theorem, Naïve Bayesian Classification. Prediction using Regression analysis.
7	<b>Cluster Analysis (5 Lectures)</b> Introduction to Cluster Analysis; Types of Data in Cluster Analysis; Classification of clustering methods-Partitioning Method, Hierarchical Method, Density-based Method, Grid-Based Method, Model-Based Method, Constraint-based Method Partitioning Methods: K-Means and K-Medoids
<b>Text Books</b>	<b>References (Books, Websites etc.):</b> <ul style="list-style-type: none"> <li>Jiawei Han, MichelineKamber, Data Mining: Concepts and Techniques, Harcourt India Pvt., 2011.</li> </ul>
<b>Reference Books</b>	<ul style="list-style-type: none"> <li>Alex Berson, Stephen J. Smith, Data Warehousing, Data Mining and OLAP, McGrawHill, 2004</li> <li>D. Hand, H. Mannila, and P. Smyth, Principles of Data Mining, MIT Press, 2011</li> </ul>

<b>Subject Name</b>	<b>205. Web Supporting Technologies</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	Any pre-requisite knowledge is not required.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	The students will get information of the basics of internet with the help of examples. It will help them to identify and remember Web supporting concepts.
<b>Understanding</b>	Remembering the definitions will help the students to understand basic concepts of HAML, JavaScript, CSS and PHP etc. In this subject, students will understand various tags, programming constructs of JavaScript, technical issues, cascading Style Sheets, forms and PHP concepts.
<b>Applying</b>	Students will Have thorough knowledge of HTML and JavaScript. They will be able to design various forms as per requirements. They will be able to apply CSS concepts in scripting. The students will also apply their creativity to display the output.
<b>Analyzing</b>	The students will relate real life problem with the JavaScript solution. They will analyze the problem and solve it.
<b>Evaluating</b>	Ability to use JavaScript construct for problem solving, handling technical issues etc.
<b>Creating</b>	Design and create their own forms for solving a real-life requirement.
<b>Unit</b>	<b>Contents</b>
1.	<b>Basics of Internet (4 Lectures)</b> Understanding internet and intranet, difference between internet and intranet, Introduction to WWW, Concept of client and server, Introduction to web server and web browser, using Apache as web server, Internet Service Providers (ISP)
2.	<b>Introduction to HTML (8 Lectures)</b> Overview of HTML, concept of Tag, types of HTML tags, structure of HTML program, Text Formatting Through HTML: Emphasizing Material in a Web Page, Using Image tag, attributes of Image tag, Lists: Using unordered, ordered, definition lists, Handling Tables: To define header rows & data rows, use of caption tag, changing height & width of table, BGcolor, Handling Tables: cell padding, cell spacing, colspan, row span, handling table data, images in table, Frames: Introduction To frames, using frames & framesets, named frames, Concept of hyperlink, types of hyperlinks, linking to the beginning of document, linking to a particular location in a document, image as hyperlinks
3.	<b>Cascading Style Sheets (4 Lectures)</b> Introducing CSS, Types of style sheets: inline, embedded and external style sheets, working with CSS properties: text properties, color and background properties, border and shading, box and block properties, positioning with CSS, various types of CSS selectors, Using class and span tag, External style sheets,

4.	<p><b>Introduction to JavaScript (Client-Side Scripting) (8 Lectures)</b>  Introduction to scripting, overview of Java Script, advantages, client-side java Script, capturing user input, writing JavaScript into HTML, Advantages and limitations of JavaScript,  <b>JavaScript Basics:</b> Data types, literals, variables and operators, Java Script arrays, dense array, operators, expressions,  <b>JavaScript Programming Constructs:</b> Assignment, data declaration, if, switch, while, for, do while, label, break, continue, function call, return, with, delete, method of invocation  <b>Dialog boxes</b> -Alert dialog box, prompt dialog box, confirm dialog box, window objects  <b>JavaScript Functions-</b> Types of functions in Java Script- Built in functions, User defined functions, function declaration, passing parameters, variable scope, return values, recursive functions  Arrays- Introduction to arrays, arrays with methods</p>
5.	<p><b>Forms (6 Lectures)</b>  Interactive web pages concepts, difference between static &amp; dynamic web pages, Concept of form, how form works, Different elements - text, password, button, submit, reset, checkbox, Radio, Text Area, select &amp; option, properties of form elements, form object's Method, Other built-in Object: String object, math object, date object, Regular Expressions, Form validation</p>
6.	<p><b>JavaScript Events (6 Lectures)</b>  What is an Event? Onclick Event Type, onsubmit Event Type, onmouseover and onmouseout, onchange, onload, onkeydown, working with DOM, Concept of Cookies and sessions, when and how to use cookies and sessions,</p>
7.	<p><b>Introduction to PHP (4 Lectures)</b>  Server-side web scripting, Adding PHP to HTML, Syntax and Variables, PHP control structures, Establishing connectivity with MySQL database</p>
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. Ivan Bayross (2006) Web Enabled Commercial Application Development Using HTML, DHTML, JavaScript, Perl CGI, BPB Publications</li> </ol>
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1. Thomas Powell, Web Design The complete Reference, Tata McGrawHill</li> <li>2. Thomas Powell and Fritz Schneider JavaScript 2.0 : The Complete Reference, Second Edition</li> <li>3. PHP: The Complete Reference By Steven Holzner, Tata McGrawHil</li> <li>4. Luke Welling, PHP and MySQL Web Development, Pearson Education; Fifth edition</li> </ol>
<b>MOOC on NPTEL</b>	<p>NPTEL / Swayam  <a href="http://www.edx.com">www.edx.com</a>  <a href="http://www.coursera.com">www.coursera.com</a>  <a href="http://www.w3schools.com">www.w3schools.com</a></p>

<b>Subject Name</b>	<b>206. Lab on Data Structures using Python</b>
<b>No. of Credits</b>	<b>4 credits</b>
<b>Pre Requisite</b>	School Level Mathematics. It does not assume any prior knowledge of programming.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some motivating examples to remember and quickly builds up basic concepts such as conditionals, loops, functions, lists, strings and tuples.
<b>Understanding</b>	By remembering students the basing concepts students will understand the concepts of searching and sorting algorithms, dynamic programming and backtracking, as well as topics such as exception handling and using files. As far as data structures are concerned, the course covers Python dictionaries as well as classes and objects for defining user defined data types such as linked lists and binary search trees.
<b>Applying</b>	Students will Have thorough knowledge about data structures and will be able to design & develop program using linear data structures&non linear data structures for solving problems
<b>Analyzing</b>	Compare efficiency of various data structures for solving a particular problem.
<b>Evaluating</b>	Ability to choose appropriate data structures for problem solving Ability to use combination of these data structures for problem solving.
<b>Creating</b>	Design and create their own data structure for solving a real life problem
<b>Unit</b>	<b>Contents</b>
1	<p>Informal introduction to programming, algorithms and data structures via gcd, Downloading and installing Python,gcd in Python: variables, operations, control_flow - assignments, conditionals, loops, functions.</p> <p><b>Suggested Programs</b>            Installation of Python IDE, understand various platforms for Python (google collaborator, Jupitar notebook)</p> <ul style="list-style-type: none"> <li>• Basic program to understand Data Types</li> <li>• creating variables, accepting input variable from user and printing their datatype</li> <li>• Mathematical functions (apply various operations on data +, -, /, *)</li> <li>• Conditional Statements (if, else, ,</li> <li>• Create functions to               <ul style="list-style-type: none"> <li>○ Find average of marks of five subjects</li> </ul> </li> </ul> <p>Find sum of first n prime numbers</p>
2	<p>Python: types, expressions, strings, lists, tuples, arrays   Python memory model: names, mutable and immutable values   List operations: slices etc - Binary search   Inductive function denitions: numerical and structural induction   Elementary inductive sorting: selection and insertion sort   In-place sorting.</p> <p><b>Suggested Programs</b></p> <ul style="list-style-type: none"> <li>• Operations on Strings, Lists , tuples and arrays               <ul style="list-style-type: none"> <li>○ Creating lists/tuple/array and accessing list elements using index</li> <li>○ Access the list/tuple element using –ve index</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>○ Extract specific element from list/tuple/array</li> <li>○ Use len(), del(), remove() and range functions on list/tuple</li> <li>• Applying different searching and sorting algorithm on data (list)</li> </ul>
3	<p>Basic algorithmic analysis: input size, asymptotic complexity, <math>O()</math> notation   Arrays vs lists   Merge sort   Quicksort   Stable sorting. Dictionaries   More on Python functions: optional arguments, default values   Passing functions as arguments   Higher order functions on lists: map, iter, list comprehension.</p> <p><b>Suggested Programs</b></p> <ul style="list-style-type: none"> <li>• Write a program for sorting given list using Quick Sort</li> <li>• Function calling (passing the variables) <ul style="list-style-type: none"> <li>○ Find factorial of a number</li> <li>○ Find fibonacci series for a given number</li> </ul> </li> <li>• Create Dictionaries with key, value pair, and access various elements of Dictionaries, Various operation using Dictionaries.</li> <li>• Usage of map, iter functions on list</li> </ul>
4	<p>Exception handling   Basic input/output   Handling files   String processing.</p> <p><b>Suggested Programs</b></p> <ul style="list-style-type: none"> <li>• Read, write, search operations on File data structure</li> <li>• Write Programs based on exception handling</li> <li>• Write program for various operations on string variables</li> </ul>
5	<p>Backtracking: N Queens, recording all solutions   Scope in Python: local, global, nonlocal names   Nested functions   Data structures: stack, queue   Heaps.</p> <p><b>Suggested Programs</b></p> <ul style="list-style-type: none"> <li>• Creation and various operations on Stack</li> <li>• Creation and various operations on queue</li> <li>• Creation and various operations on heap</li> <li>• Defining scope variables in Python</li> </ul>
6	<p>Abstract datatypes   Classes and objects in Python   "Linked" lists: find, insert, delete   Binary search trees: find, insert, delete   Height-balanced binary search trees.</p> <p><b>Suggested Programs</b></p> <ul style="list-style-type: none"> <li>• Creation of class data structure, Abstract classes</li> <li>• Creation of Link List and various operations on Link List</li> <li>• Implementation of tree data structure using class concept</li> </ul>
7	<p>Efficient evaluation of recursive definitions: memoization   Dynamic programming: examples   Other programming languages: C and manual memory management   Other programming paradigms: functional programming.</p> <p><b>Suggested Programs</b></p> <p>Comparison of all discussed algorithm with their implementation in C and compare memory usage</p>
<b>Text Books</b>	<p>Data Structures and Algorithms in Python Paperback – 2016 by Michael T. Goodrich (Author), Roberto Tamassia (Author), Michael H. Goldwasser (Author) WILEY PUBLICATION</p> <p>Data Structure and Algorithmic Thinking with Python Paperback – 2015 by</p>

<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/106/106106145/#">https://nptel.ac.in/courses/106/106/106106145/#</a>

<b>Subject Name</b>	<b>209 Foreign Language : Japanese Language Proficiency</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	Basic English ( Grammar and Sentence Formation)
<b>Cognitive Abilities</b>	<p>The ability to understand some basic Japanese.</p> <ul style="list-style-type: none"> <li>• One is able to read and understand typical expressions and sentences written in hiragana ,katakana , and basic kanji .</li> <li>• One is able to listen and comprehend conversations about topics regularly encountered indaily life and classroom situations, and is able to pick up necessary information from short</li> <li>• conversations spoken slowly.</li> </ul>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>▪ Recognise the symbols, Numbers in Kanjis</li> <li>▪ Greetings</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>▪ Understand the Language Knowledge (Vocabulary, Grammar, Kanji )</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>▪ Reading and understand typical expressions and sentences</li> <li>▪ Using Kanjis in expressions and sentences</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>▪ Basic Communication in Japanese</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>▪ Frame the dialogue to communicate in Japanese</li> </ul>
<b>Creating</b>	Construct the simple sentences
<b>Syllabus</b>	
<b>1</b>	<p>General Features of Japanese</p> <p>Japanese Script</p> <p>Pronunciation of Japanese</p> <p>Daily Greetings and Expression</p> <p>Numerals</p>
<b>2</b>	<p>a) Vocabulary</p> <p>b) Translation – Sentence Pattern and Example Sentence</p> <p>c)Conversation – How do you do?</p> <p>Reference word- Country , people and Language</p>
<b>3</b>	<p>a) Vocabulary</p> <p>b) Translation – Sentence Pattern and Example Sentence</p> <p>c)Conversation – This is just a token</p> <p>Reference word- Family Names</p>
<b>4</b>	<p>a) Vocabulary</p> <p>b) Translation – Sentence Pattern and Example Sentence</p> <p>c)Conversation – I ‘ll take it</p> <p>Reference word- Department Store</p>
<b>5</b>	<p>a) Vocabulary</p> <p>b) Translation – Sentence Pattern and Example Sentence</p> <p>c)Conversation – What are your opening hours?</p> <p>Reference word- Phone and Letter</p>
<b>6</b>	<p>a) Vocabulary</p> <p>b) Translation – Sentence Pattern and Example Sentence</p> <p>c)Conversation – Does this train goes to koshien?</p> <p>Reference word- National Holidays</p>
<b>Text Books</b>	Minna No Nihongo -I

Subject Name	<b>209: Digital Technology</b>
Credits	<b>2 credits</b>
<b>Course Objective:</b> <ul style="list-style-type: none"> <li>To understand, communicate and adapt to a digital world as it impacts their personal life, society, and the business world.</li> <li>To actively engage students in the processes of analysing problems and opportunities, designing, developing and evaluating digital solutions, and creating and sharing information that meets a range of current and future needs.</li> <li>To learn and ethically exploit the capacity of information systems to create digital solutions.</li> </ul>	
<b>Learning Outcome : At the end of this course, student should be able to</b> <ul style="list-style-type: none"> <li>Exposure to foundation knowledge in hardware, software, programming, web design, IT support, and networks.</li> <li>Students will apply their knowledge to situations and defend their actions/ decisions/ choices through the knowledge and skills acquired in this course.</li> </ul>	
<b>Pre-requisites:</b> Preliminary knowledge of computer, ICT, Digital learning, their operations and applications.	
<b>References (Books, Websites etc):</b> <ul style="list-style-type: none"> <li><a href="https://www.education.vic.gov.au/school/teachers/teachingresources/digital/Pages/teach.aspx">https://www.education.vic.gov.au/school/teachers/teachingresources/digital/Pages/teach.aspx</a></li> <li><a href="https://www.encyclopedia.com/history/dictionaries-thesauruses-pictures-and-press-releases/digital-technology">https://www.encyclopedia.com/history/dictionaries-thesauruses-pictures-and-press-releases/digital-technology</a></li> <li><a href="https://www.education.vic.gov.au/school/teachers/teachingresources/digital/Pages/teach.aspx">https://www.education.vic.gov.au/school/teachers/teachingresources/digital/Pages/teach.aspx</a></li> <li><a href="https://www.cambridgeinternational.org/Images/271191-digital-technologies-in-the-classroom.pdf">https://www.cambridgeinternational.org/Images/271191-digital-technologies-in-the-classroom.pdf</a></li> <li><a href="https://www.digitaled.in/blogs/digital-learning-types-technology-and-methods-of-teaching-and-learning/">https://www.digitaled.in/blogs/digital-learning-types-technology-and-methods-of-teaching-and-learning/</a></li> </ul>	
<b>Suggested MOOC:</b> Please refer these websites for MOOCS:-	
<b>Course Plan</b>	
<b>Unit</b>	<b>Contents</b>
<b>1</b>	<b>Introduction:</b> Introduction to Digital Technology, Purpose of Digital Technology, History of Digital Technology, Scope of Digital Technology, Examples of Digital Technology: social media, online games, multimedia and mobile phones. Benefits and challenges of digital technologies in the classroom.
<b>2</b>	<b>Terms are associated with digital technology:</b> Bring your own device (BYOD), E-portfolios, Flipped classroom, Personal Learning Network (PLN), Virtual Learning Environment (VLE), Interactive Whiteboards (IWB), Software Applications (Apps), Web 2.0, Telecommunication, Fibre Optics, Cellular Telephones, Digital printing, pulse code modulation (PCM)

3	<p><b>Types of Digital Technology:</b></p> <p>Artificial Intelligence (AI): Introduction, Applications, scope, history Advantages and Disadvantages,</p> <p>Machine Learning (ML) : Introduction, Applications, scope, history Advantages and Disadvantages</p> <p>Deep Learning (DL) : Introduction, Applications, scope, history Advantages and Disadvantages</p>
4	<p><b>Digital Learning:</b></p> <p>Types, Technology and Methods of Teaching and Learning</p>
5	<p><b>Support System:</b></p> <p>Support system for teachers and students to use of digital technologies in the classroom, SAMR (Substitution, Augmentation, Modification, Redefinition) model developed by Dr Ruben Puentedur</p>

<b>Subject Name</b>	<b>209 Human Psychology at Workplace</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Objectives</b>	<ul style="list-style-type: none"> <li>To expose the students to the fundamentals of Human Psychology - such as working with people, nature of organizations, communication, leadership and motivation of people.</li> <li>To help students develop a conceptual understanding of Behavioral theory theories</li> <li>To enable the students to put the ideas and skills of Psychology into practice</li> </ul>
<b>Course Outcome</b>	<ul style="list-style-type: none"> <li>To understand the dynamics of individual and Human Psychology and relationships.</li> <li>To understand the importance of human behavior in managerial functions</li> </ul>
<b>Unit No</b>	<b>Syllabus content</b>
<b>1</b>	<b>Foundations of Individual Behavior</b> Attitudes and Job Satisfaction, Components of Attitude, Major Job Attitude, Job Satisfaction, Personality and Values, Personality Determinants, MBTI, Big – Five Model, Values, Formation, Types of Values, Perception, Factors influencing perception
<b>2</b>	<b>Motivation and Leadership :</b> Motivation and Leadership Concept of motivation, Definition, Theories of Motivation, Maslow's need Theory, ERG Theory, Theory X and Theory Y, Two Factor Theory, McClelland's Theory, Equity Theory, Vroom's Expectancy Theory. Concept of Leadership, Theories of leadership, Traits of good Leader, Difference between Leader and Manager
<b>3</b>	<b>Groups and Teams:</b> Concept of OB, Foundations of Group Behaviour, Formation of Group, Group Classification, Properties, Roles, norms, status, size and cohesiveness, Group decision making, Understanding teams, creating effective teams, Conflict Process, Conflict management communication
<b>4</b>	<b>Culture</b> Culture Definition, Culture's function, need and importance of Cross Cultural management, Stress and its Management.
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1) Kavita Singh, Organizational Behavior, Vikas Publications</li> <li>2) Robbins, Timothy Judge, Seema Sanghi, Organizational Behavior, Stephen Pearson Prentice Hall, 12 edition</li> <li>3) Fred Luthans, Organizational Behavior, McGraw Hill Inc.</li> <li>4) John Newstrom and Keith Davis, Organizational Behavior, Tata McGraw Hill, 11 edition</li> <li>5) Ashwa Thapa, Organizational Behavior</li> </ol>

## **SEMESTER III**

<b>Subject Name</b>	<b>301. Software Design Patterns</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre-Requisite</b>	This course assumes students should have following knowledge: <ul style="list-style-type: none"> <li>• OOAD and UML.</li> <li>• Software Engineering</li> <li>• Java Programming</li> </ul>
<b>Cognitive Abilities</b>	Course Outcome as per Blooms Taxonomy
<b>Remembering</b>	Ability to identify the structure, framework of Design Patterns for a given problem
<b>Understanding</b>	Ability to understand the meanings, concepts and types of Design Patterns
<b>Applying</b>	Ability to decide and suggest a design pattern for the given problem
<b>Analyzing</b>	Exploit the possibilities and limitations of basic design patterns for a given problem and ability to analyze a software development problem
<b>Evaluating</b>	Ability to evaluate, assess the design pattern that are appropriate for a given problem
<b>Creating</b>	Create software design that are scalable, robust and easily maintainable and consisting multiple modules
<b>Unit No</b>	<b>Contents</b>
1	<b>Introduction to Design Patterns (4 Lectures)</b> Reusable design Patterns: Meaning & Use of Design Patterns, Organizing the Patterns, describing pattern, how to use the patterns while solving the problem, Applications of different design patterns in various cases. Selection of a Design Pattern
2	<b>Creational Patterns (8 Lectures)</b> Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences and Implementation of following Creational Patterns: - Factory Method, Abstract Factory, Builder, Prototype, Singleton. Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Creational design pattern.
3	<b>Structural Patterns (8 Lectures)</b> Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of Following Structural Patterns Adapter (class), Adapter (object), Bridge, Composite, Decorator. Façade, Flyweight, Proxy. Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Structural design patterns.
4	<b>Behavioral Patterns – I (8 Lectures)</b> Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of following Behavioral Pattern Interpreter, Template Method, Chain of Responsibility, Command, Iterator Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Behavioral Design Patterns – I
5	<b>Behavioral Patterns – II (8 Lectures)</b>

	<p>Intent, Motivation, Applicability, Structure, Participants, Collaborations, Consequences, Implementation of following Behavioral Pattern</p> <p>Mediator, Memento, Observer, State, Strategy, Visitor</p> <p>Tutorial: Tutorials should be conducted in LAB using JAVA for implementing Behavioral Design Patterns – II</p>
6	<p><b>JEE Patterns (6 Lectures)</b></p> <p>Presentation Layer Design Pattern, Business Layer Design Pattern, Integration Layer Design Pattern</p> <p>Tutorial: Tutorials should be conducted in LAB using JAVA for implementing above Patterns</p>
7	<p><b>Case Study (4 Lectures)</b></p> <ul style="list-style-type: none"> <li>• Designing a parking lot</li> <li>• Designing Movie Ticket Booking System</li> <li>• Design Logistic System</li> <li>• Online Hotel Booking System OYO</li> </ul>
<b>Text Books</b>	Head First Design Patterns, Eric Freeman, Elisabeth Freeman, Kathy Sierra, Bert Bates,
<b>Reference Books</b>	<ul style="list-style-type: none"> <li>• Design Patterns Elements of Reusable Object-oriented Software- Erich Gama, Richard Helm, Ralph Jonson</li> <li>• Ben Schneiderman, Designing the User Interface, Pearson Education, 1998</li> </ul>
<b>MOOCs on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/105/106105224/">https://nptel.ac.in/courses/106/105/106105224/</a>
<b>Web Resources</b>	<a href="https://www.tutorialspoint.com/design_pattern/index.htm">https://www.tutorialspoint.com/design_pattern/index.htm</a> <a href="https://www.javatpoint.com/design-patterns-in-java">https://www.javatpoint.com/design-patterns-in-java</a>

<b>Subject Name</b>	<b>302. Artificial Intelligence</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some motivating examples to remember and quickly builds up basic concepts such as visual perception, speech recognition, decision-making, and translation between languages
<b>Understanding</b>	By remembering the basic concepts students will understand the concepts of Natural-language understanding (NLU) or natural-language interpretation (NLI), as well as topics such as simulation process of human intelligence by machines and special computer systems. As far as artificial intelligence is concerned the course covers natural language processing, Knowledge Representation Issues, Symbolic Reasoning under Uncertainty as well as Machine Learning (ML) using Python.
<b>Applying</b>	Students will have thorough knowledge about various level of mathematics, including probability, statistics, algebra, calculus, logic and algorithms. Bayesian networking or graphical modeling, including neural nets. Physics, engineering and robotics, Computer science, programming languages and coding. Knowledge of Python is essential.
<b>Analyzing</b>	Compare efficiency of various Theories of Intelligence and learning from experience for solving a particular problem.
<b>Evaluating</b>	Ability to choose appropriate Knowledge based approach for problem solving. Ability to use combination of these artificial intelligence theories for problem solving.
<b>Creating</b>	Design and create their own artificial intelligence applications for solving a real life problem
<b>Text Books</b>	1)Artificial Intelligence : A Modern Approach, Stuart Russel, Peter Norvig 2)Artificial Intelligence and Machine Learning by Chandra S.S.V, PHI
<b>Reference Books</b>	<ul style="list-style-type: none"> <li>• “Artificial Intelligence” -By Elaine Rich And Kevin Knight (2nd Edition) Tata McGraw-Hill</li> <li>• Artificial Intelligence A New Synthesis :Nilson, Elsevir</li> <li>• Introduction to Artificial Intelligence and Expert System- Patterson, Prentice Hall India.</li> <li>• Shai shalev-shwartz, Shai Ben-David: Understanding Machine Learning from Theory to algorithms, Cambridge University press.</li> </ul>
Refer these websites for MOOC's	NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>
<b>Unit No</b>	<b>Content</b>
1	<b>Introduction (4 Lectures)</b> What is AI? ,The AI Problems, Background/history, What Is An AI Techniques, The Level Of The Model, Criteria For Success, Some General References, High-level overview of field, State of the art.
2	<b>Introduction and historical perspective, Hard and Soft AI(7 Lectures)</b> Disciplines and applications, Theories of Intelligence, Detecting and Measuring

	Intelligence, Knowledge based approach, Problems, State Space Search & Heuristic Search Techniques: Defining The Problems as A State Space Search, Production Systems, Production Characteristics, Production System Characteristics, And Issues In The Design Of Search Programs, Additional Problems. Generate – And-Test, Hill Climbing, Best-First Search, Problem Reduction, Constraint Satisfaction, Means-Ends Analysis.
3	<b>Knowledge Representation Issues(6 Lectures)</b> Representations And Mappings, Approaches To Knowledge Representation. Using Predicate Logic: Representation Simple Facts In Logic, Representing Instance And Isa Relationships, Computable Functions And Predicates, Resolution. Representing knowledge Using Rules: Procedural Versus Declarative Knowledge, Logic Programming, Forward Versus Backward Reasoning
4	<b>Symbolic Reasoning under Uncertainty(5 Lectures)</b> Introduction To Non-monotonic Reasoning, Logics For Non monotonic Reasoning. Statistical Reasoning: Probability And Bays’ Theorem, Certainty Factors And Rule-Base Systems, Bayesian Networks, Dumpster-Shafer Theory, Fuzzy Logic.
5	<b>Natural Language Processing(5 Lectures)</b> Introduction, Syntactic Processing, Semantic Analysis, Semantic Analysis, Discourse And Pragmatic Processing, Spell Checking. Connectionist Models: Introduction: Hopfield Network, Learning In Neural Network, Application Of Neural Networks, Recurrent Networks, Distributed Representations, Connectionist AI And Symbolic AI.
6	<b>Introduction to machine learning (7 Lectures)</b> IntroductionMachine Learning Concepts, methods and models, Supervised Learning, unsupervised and semi-supervised, Learning Decision Trees, Evaluating and Choosing the Best Hypothesis, , <b>Introduction to Numpybasics</b> , creating numpy arrays ,structure and content of arrays, subset, slice, index and iterate through arrays, multidimensional arrays, python lists vs numpy arrays, introduction to numpy operations on numpy arrays , operations on arrays basic linear algebra operations.
7	<b>Introduction to pandas (8 Lectures)</b> Introduction, pandas basics, indexing and selecting data, merge and append, grouping and summarizing data frames, lambda function & pivot tables, reading delimited and relational databases, reading data from websites, getting data from apis, reading data from pdf files, cleaning datasets. <b>Case study:</b> For example, to explore a dataset stored in a CSV on your computer. Pandas will extract the data from that CSV into a Data Frame — a table, basically — then let you do things like: Calculate statistics and answer questions about the data, like 1) What’s the average, median, max, or min of each column? 2) Does column A correlate with column B? 3) What does the distribution of data in column C look like? 4)Clean the data by doing things like removing missing values and filtering rows or columns by some criteria

	<p>5) Visualize the data with help from Matplotlib. Plot bars, lines, histograms, bubbles, and more.</p> <p>6)Store the cleaned, transformed data back into a CSV, other file or database</p>
--	---

<b>Subject Name</b>	<b>303. Information Security</b>
<b>No. of Credits</b>	<b>4 Credits</b>
<b>Pre Requisite</b>	Basic Knowledge about Software Development Life Cycle, System Analysis
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of software development and software engineering Information can be understood and remembered .
<b>Understanding</b>	By remembering students the basing concepts students will understand the concepts of Information , Characteristics , Levels of Information, Information Security Measures and various stages in Information testing Life Cycle .
<b>Applying</b>	Students will Have thorough knowledge about Measures of Information Security and Cyber security at higher level , network security measures and various scanner and cleaners
<b>Analyzing</b>	To Measure the risk of Information loss or theft and over come the Information Security by scientific and proper methods .
<b>Evaluating</b>	Ability to select proper method to protect the information from misuse and make the organization full proof from various Information threats.
<b>Creating</b>	Design and create their own procedure to protect the important data and information at all the levels.
<b>Unit No</b>	<b>Contents</b>
1	<b>Introduction and Background (5 Lectures)</b> Basic concepts of Information, Information Characteristics, sources of Information, Types of Information, Generating Information in Organizations. Business Application of Information and Information System, What is Information security? Need for Information Security , Types of Organization , Functions of Business organization , Levels of Organization , How Organizations manage the information , flow of information.
2	<b>Basics of Networking for Security Purpose (8 Lectures)</b> Network Installations, Types of Networks and their security issues, Types of Network of OS. Functions of Information security officer. Different measures to safe guard the important information in the organization. Network policy for protecting important resources of the Network. Basic concept of MIS and Organization flow of Information.
3	<b>Importance of Information Security (7 Lectures)</b> Improvement in corporate reputation based on the height of the level of information security, threat to business continuity due to accidents related to information systems, cyber space, information assets, threats, and vulnerabilities. Information Security Measures. <b>Threats</b> :- Types of threats physical threats (accident, disaster, fault, destruction, theft, unauthorized intrusion, etc.), technical threats (unauthorized access, eavesdropping , spoofing, alteration, error, cracking, etc.), man-made threats (operational error, loss, damage, peep, unauthorized use, social engineering, etc.), cyber-attack, information leakage, intent, negligence, mistake, fraudulent behavior, sabotage, DoS attack, rumor, flaming, SPAM e-mail, file sharing software [Malware / malicious programs] computer virus, macro virus, worm, bot (botnet, remote operated virus), Trojan horse, spyware, ransom ware, key logger, root kit, backdoor, fake anti-virus software

4	<p><b>Information security technology (cryptography) (7 Lectures)</b>  <b>CRYPTREC</b> ciphers list, cryptography (encryption key), decryption (decryption key), decoding, symmetric cryptography (common key), public key cryptography (public key, private key)), AES (Advanced Encryption Standard), S/MIME (Secure MIME), PGP (Pretty Good Privacy), hybrid encryption, hash function (SHA-256, etc.), key management, disk encryption, file encryption, compromise. digital signature (signature key, verification key), timestamp (time authentication), message authentication, MAC (Message Authentication Code), challenge-response authentication.</p> <p><b>Human assets</b> (people, and their qualifications, skills, and experience), intangible assets, service, risk management (JIS Q 31000), monitoring, information security events, information security incidents.</p>
5	<p><b>Information security Management (7 Lectures)</b>  Management of information based on the information security policy, information, information assets, physical assets, software assets</p> <p><b>Risk analysis and evaluation (Information asset review / Classification)</b>  information assets review, classification and management by importance of information assets, information assets ledger Risk analysis and evaluation (Risk type)loss of property, loss of responsibility, loss of net earnings, human cost, operational risk, supply chain risk,</p>
6	<p><b>Information security regulations (8 Lectures)</b>  (Company regulations including information security policy) organizational operation according to the information security policy, information security policy, information security purpose, information security measures criteria, information management regulations, security control regulations, documentation control regulations, regulations on measures to be taken against computer virus infection, regulations on measures against accidents, information security education regulations, privacy policy (personal information protection policy), employment agreement, office regulations, penal provisions, outward explanation regulations, regulations for exceptions, regulations for updating rules, procedure for approving regulations</p>
7	<p><b>Management of Information Asset. (8 Lectures)</b>  Security Incidents management, reducing risk in Information loss and keeping the information safe from unauthorized users and threats .</p> <p><b>Information Technology Act, Cyber Crimes and Cyber Laws.</b> -What are cyber-crimes? Types of cyber-crimes. Categories of Cyber Crime, Online business threats , Online business frauds Safety tips for online business. , IT Policy for Information protecting. risk involved in usage of external service, risk involved in distribution of information by SNS, moral hazard, estimated annual loss, scoring method, cost factor .</p>
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. Information Security Management Handbook, Sixth Edition, Volume 5-2012 Amazon BooksEdited by - Micki Krause Nozaki, Harold F. Tipton.</li> <li>2. Cyber Security Understanding Cyber Crimes, Computer Forensics and Legal Perspectives Nina Godbole and SunitBelpure, Publication Wiley.</li> <li>3. Information Security: Principles and Practice 1st , Kindle Edition -2005 Amazon BooksAuthor - Mark Stamp</li> <li>4. "Cryptography and information Security" V.K.Pachghare, PHI Learning Private Limited, Delhi India.</li> <li>5. Analyzing Computer Security by Charles P. Pfleeger, Shari LawerancePfleeger, Pearson Education India</li> <li>6. Anil Gaikwad , JyotiBiradar (Patil) "Basic Concepts of System Analysis"</li> </ol>

	Lambert Academic Publication Dec. 2019 .
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1. Practical Information Security Management: A Complete Guide to Planning and Implementation-Dec-2016 Amazon Books . Tony Campbell</li> <li>2. Managing Risk and Information Security :- Protect to Enable</li> <li>3. Anil Gaikwad , JyotiBiradar (Patil) Software Project Management Made Easy Lambert Academic Publication Dec 2019.</li> </ol>
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/">https://nptel.ac.in/courses/</a> , <a href="http://www.freotechbooks.com/managing-risk-and-information-security-protect-to-enable-t1150.html">http://www.freotechbooks.com/managing-risk-and-information-security-protect-to-enable-t1150.html</a>

<b>Subject Name</b>	<b>306. Lab on Software Testing</b>
<b>No. of Credits</b>	<b>3 Credits</b>
<b>Pre Requisite</b>	<ul style="list-style-type: none"> <li>• Fundamental knowledge of computer.</li> <li>• Fundamental knowledge of Software Engineering, System Analysis and Design.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	The purpose of this course is to build the skills necessary to perform software testing at the function, class and application level. This course will enable students to
<b>Understanding</b>	Concepts of developing test plan, test cases, execution of test cases etc.
<b>Applying</b>	Work on automated software testing tools like bugzilla, winrunner, selenium, test link etc.
<b>Analyzing</b>	Analyse the requirements for the given problem statement Find defects which may get created by the programmer while developing the software.
<b>Evaluating</b>	Gain confidence to write and execute test cases. To get the knowledge about automated testing and automated testing tools.
<b>Creating</b>	Design and implement the solution for given problem in any programming language. Derive test cases and execute test cases for any given problem.
<b>Unit No</b>	<b>Contents</b>
1	<b>Software Testing basics</b> Basic testing vocabulary, Quality assurance versus Quality control, Cost of quality, Software quality factors, How quality is defined? Why do we test software? What is a defect?, The Multiple roles of the software tester, Scope of testing, When should testing occur?, Testing constraints, Life cycle testing, Independent testing, Levels of testing, The “V” Concept of testing
2	<b>Testing Techniques and test administration</b> Structural versus Functional Technique Categories, Verification versus Validation, static versus Dynamic Testing, Examples of Specific Testing Techniques like white box testing and black box testing, Test Planning, Customization of the Test Process, Budgeting, Scheduling
3	<b>Create the Test Plan</b> Prerequisites to test planning, Understand the Characteristics of the Software Being Developed, Build the Test Plan, Write the Test Plan. Study of test management tool: Test Director
4	<b>Test cases</b> Test Cases, Test case Design, Building test cases, Test data mining, Test execution, Test Reporting, Defect Management, Test Coverage – Traceability matrix Test Metrics – Guidelines and usage, Test reporting: Guidelines for writing test report, Test Tools used to Build Test Reports Manual testing Case Study □ Requirements / User Story Study Hands on □ Test planning Hands on □ Test design Hands on □ Test execution Hands on
5	<b>Managing Change</b>

	<p>Software Configuration Management, Change Management, Risks: Risk Analysis and Management with examples, User Acceptance testing: in detail explanation with details</p> <p>Case Study: How to test web, stand alone and database applications – with examples.</p> <p>Help with resume and testing interview skills</p>
6	<p><b>Automation Testing</b></p> <p>Basics of automation testing – why, when, how to perform automation testing, Factors for choosing a particular tool, An overview for the major functional testing tools. Overview of Test management and bug tracking tools.</p>
7	<p><b>Automation testing tools</b></p> <p>Study of bug tracking tool: Bugzilla. Study of winrunner, study of web testing tool selenium.</p> <p>Study of open source testing tool: test link, Case study for automation testing</p>
<b>Text Books</b>	<p>Hetzel, The Complete Guide to Software Testing, John Wiley &amp; Sons.</p> <p>Software Testing by RenuRajani and Pradeep Oak</p>
<b>Reference Books</b>	<p>1. Testing in 30+ Open Source Tools, Rahul Shende, Shroff Publishers &amp; Distributor Pvt. Ltd, ISBN 13: 9789350231005 ( page numbers from 15 to 117 )</p> <p>2. <a href="http://seleniumhq.org/">http://seleniumhq.org/</a></p> <p>3. <a href="http://sourceforge.net/projects/sahi/">http://sourceforge.net/projects/sahi/</a></p> <p>4. <a href="http://testng.org/doc/index.html">http://testng.org/doc/index.html</a></p>

<b>Subject Name</b>	<b>309. Social Change in Technology</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Course Objective</b>	<ul style="list-style-type: none"> <li>• To help the student to see the need for developing a holistic perspective of life.</li> <li>• To aware the student to see the need for developing science and Technology.</li> <li>• To sensitize the students about the scope of technology and its impact on social change.</li> <li>• To develop more confidence and commitment to understand, learn and act accordingly</li> </ul>
<b>Pre Requisite</b>	
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Understand the meaning of technology and social change
<b>Understanding</b>	Learn the ideas of prominent sociological thinkers on social change and understanding their explanation on society and how it changes with time
<b>Applying</b>	Describe and assess technological development and resulting social changes emanating from the information revolution
<b>Analyzing</b>	Analyse social changes emanating from the information revolution
<b>Evaluating</b>	Describe and evaluate the relationship of social change to the development, impact
<b>Creating</b>	Diffusion of modern communication technologies in society
<b>Unit No</b>	<b>Contents</b>
1	<b>Introduction to Social Change</b> :What is Social change , Role of society in change, social change as a dynamic concept , existing theories of social change., innovation and invention as a social process for social change
2	<b>Discovery Social change</b> : Link between education and social change ,concept of Science and Technology, role of technology in social change, Causes and Effects of Technology in social changes, discovery as a social process for social change and technological development, trends of technology, social processes that are involved in the development of technologies and social change
3	<b>Digital divide and social change</b> : Computers, equity, education and digital divide, technology & work/business, Role of ICT in government & military, technological development and resulting social changes emanating from the information revolution, relationship of social change to the development, impact and diffusion of printed materials, Internet, email and social media in society.
4	<b>Social issues caused by the rise in technology</b> : Computer crime and security, Intellectual property and responsible computing, identify and evaluate past, present, and potential future political and ethical issues involving technology and economy
<b>Text Books</b>	Human Societies as Sociocultural System by Nolan & Lenski 1983
<b>Reference Books</b>	Technology and Globalisation : An Overview by McMaho 200
<b>Online Resources</b>	<a href="http://www.youtube.com/watch?v=0dK3mL35nkk">http://www.youtube.com/watch?v=0dK3mL35nkk</a> <a href="http://www.researchchannel.org/mov/usc_ctt_reltec_250k_qt.mov">http://www.researchchannel.org/mov/usc_ctt_reltec_250k_qt.mov</a>
<b>MOOC on NPTEL</b>	<a href="http://www.SWAYAM.gov.in">www.SWAYAM.gov.in</a>

<b>Subject Name</b>	<b>309: Water Management</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	Basics of Environmental studies
<b>Cognitive Abilities</b>	<ul style="list-style-type: none"> <li>To learn how to analyse and comprehend basic principle of water resources and its planning and management</li> <li>To visualise systematic process on environmentally water resource management and sustainable water resource development</li> <li>To launch the skillful techniques for water resource planning and management</li> </ul>
<b>Remembering</b>	Basic Needs of Human
<b>Understanding</b>	Availability of water resource
<b>Applying</b>	Method for water harvesting based on the area.
<b>Analyzing</b>	The issues related to planning and management of water resources
<b>Evaluating</b>	Water issues related to particular area
<b>Creating</b>	Construct the solution based on Water Management Problem
<b>Unit No</b>	<b>Contents</b>
<b>1</b>	Introduction: Sources and Uses of water (primary, secondary and tertiary sector uses); Concept of virtual water; Health and environmental concerns of availability and quality of water resources.
<b>2</b>	Crisis in Water Resources: Water crisis and water stress; Protection of aquifers; Water rights and its legal implications; Politics of water sharing
<b>3</b>	<b>Water Resources Planning and Management:</b> Necessity, System components, planning scales, Approaches, planning and management aspects, Analysis, Models for impact prediction and evaluation, Adaptive Integrated Policies, Post Planning and management Issues
<b>4</b>	<b>Water Harvesting and Conservation:</b> Water Harvesting Techniques – Micro-catchments -Design of Small Water Harvesting Structures – Farm Ponds – Percolation Tanks – Yield from a Catchment, Rain water Harvesting-various techniques related to Rural and Urban area.
<b>Reference Books</b>	K. Subramanya, Engineering Hydrology, Tata McGraw Hill Publishers, New Delhi. H.M. Raghunath, Ground Water, Wiley Eastern Publication, New Delhi. Daniel P. Loucks and Eelco van Beek, Water Resources Systems. Planning and Management, UNESCO Publication. Mollinga, P. et al, Integrated Water Resources Management, Water in South Asia Volume I, Sage Publications, 2006. Singh, Chhatrapati Water Rights in India, Ed: Chhatrapati Singh. Water Law in India: The Indian Law Institute, New Delhi, 1992. Dhruva Narayana, G. Sastry, V. S. Patnaik, Watershed Management, CSWCTRI, Dehradun, ICAR Publications, 1997

<b>Subject Name</b>	<b>309 Economics for IT Industry</b>
<b>No. of Credits</b>	<b>2 Credits</b>
<b>Pre Requisite</b>	Introductory knowledge of IT industry with application skills.
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>To study changes in the environment in which firms operate influence their decision-making and outcome</li> <li>To acquaint learners with basic concepts and techniques of economic analysis and their application to managerial decision-making in the IT industry.</li> <li>To prepare the students for the use of various economics terminologies and techniques in IT industry.</li> <li>To understand recent developments in the economic situation and its impact on economic decision making.</li> </ul>
<b>Cognitive Abilities</b>	<b>. Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Students will have the fundamental knowledge of the industrial economy and especially of the IT industry
<b>Understanding</b>	Understand the concept of economics for IT industry Use of economics in IT industry A better understanding of IT industry contribution to the Indian economy
<b>Applying</b>	Economics allows you to drive positive change for the betterment of the company and the industry
<b>Analyzing</b>	Analyze the demand and supply conditions and assess the position of a company.
<b>Evaluating</b>	Examine the possible economic risks and identify policies to address them Study price structure of designed software
<b>Creating</b>	Study the economics of IT sector
<b>Unit No</b>	<b>Contents</b>
1	<b>Introduction Economics and IT industry</b> <ul style="list-style-type: none"> <li>Meaning and scope of Industrial Economics .</li> <li>Need and importance of industry economics.</li> <li>IT industry and its contribution to the Indian Economy.</li> <li>Factors hindering the IT Industry in India</li> </ul>
2	<b>Theory of Demand and Supply</b> <ul style="list-style-type: none"> <li>Theory of Demand Supply</li> <li>Law of Demand and Supply.</li> <li>Elasticity of demand .</li> <li>Supply and demand chain</li> </ul>
3	<b>Theory of company /Firm :</b> <ul style="list-style-type: none"> <li>Size and structure of the company</li> <li>Size and structure of the IT industry in India</li> <li>Technological View of the firm</li> <li>Marketing Boundaries</li> <li>Determining the marketing boundaries and Structure</li> <li>Competition</li> <li>Price output- long run/ short run</li> <li>Monopoly</li> </ul>
4	<b>Macro economics</b> <ul style="list-style-type: none"> <li>Macroeconomics</li> <li>Competition and industrial Policy</li> </ul>

	<ul style="list-style-type: none"> <li>• Current issues in the IT industry and Competition</li> <li>• Government and IT industry policies</li> <li>• R&amp; D in It Industry</li> <li>• Government Monetary policy and its impact in IT industry</li> </ul>
<b>Text Books</b>	<ul style="list-style-type: none"> <li>• Managerial Economics DN Dwivedi Vikas Publishing</li> <li>• Managerial Economics and Micro Economic G.S Gupta</li> <li>• Macro Economics R.Dornbusch, S.Fischer</li> <li>• Factors underlying the slow growth of Indian industry A V Desai Oxford University Press.</li> </ul>
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1 <a href="http://www.rbi.org.in">www.rbi.org.in</a></li> <li>2 <a href="http://www.economicshelp.org">www.economicshelp.org</a></li> <li>3 <a href="http://www.federalreserve.gov">www.federalreserve.gov</a></li> <li>4 <a href="http://www.economist.com">www.economist.com</a></li> <li>5 International Journal of Economic policy in Emerging Economies <a href="https://www.inderscience.com/jhome.php?jcode=ijepee">https://www.inderscience.com/jhome.php?jcode=ijepee</a></li> </ol>

## **ELECTIVE GROUPS**

### ELECTIVE GROUP (01): CLOUD COMPUTING

<b>Subject Name</b>	<b>01(A ) Virtualization</b>
<b>No. of Credits</b>	3 Credits (2 Lectures + 1 Tutorial)
<b>Pre Requisite</b>	Knowledge of Cloud Computing Concepts Knowledge of Virtualization Knowledge of Cloud security Knowledge of Web technologies
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	How to provide Flexible and scalable infrastructures as per user requirement
<b>Understanding</b>	Understanding the components of Virtualization
<b>Applying</b>	Carrying out practical's through Virtualization
<b>Analyzing</b>	The case studies will help us to understand more of practice of cloud computing in the market.
<b>Evaluating</b>	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
<b>Creating</b>	Creating flexible and scalable infrastructure suitable to the organizational need
<b>Unit No</b>	<b>Contents</b>
1	<b>Overview Of Virtualization (Lectures/practical's : 7)</b> Introduction to Virtualization, Virtualization Approaches, Virtualization for Server Consolidation and Containment, Hardware Support for Virtualization, Para-Virtualization, vmWare's Virtualization Solutions
2	<b>Understanding Virtualization (Lectures/practical's :7)</b> The Roots of Virtualization, Making Better Use of Your Systems with Virtualization, Approaches to Virtualization, Understanding the Virtualization Ecosystem, Reasons to Invest in Virtualization Hardware. <b>vmWare :</b> what is VmWare, Virtualization with Vmware, VmWareProducts,Data Center and Cloud Infrastructure, Networking and Security, SDDC Platform, Storage and Availability, The vmWare Approach to the Cloud, vmWare vSphere 4, Server Consolidation and Containment
3	<b>Hypervisor (Lectures/practical's : 7)</b> What is Hypervisor, Type 1 Hypervisor, Type 2 Hypervisor, Types of Hardware Virtualization : Full Virtualization, Emulation Virtualization, Para virtualization., Installing Hyper-V In Windows Server 2012,
4	<b>Types Of Virtualization (Lectures/practical's : 7)</b> Server Virtualization, Client & Desktop Virtualization Services and Applications Virtualization, Network Virtualization, StorageVirtualization
5	<b>Tools For Virtualization (Lectures/practical's : 05)</b> Virtualization with Xen, Virtualization with Bochs and QEMU, Virtualization with Lguest, Virtualization with KVM
6	<b>Virtualization For Businesses (Lectures/practical's:05)</b> Need for Virtualization in a Business, Implementation of Virtualization in a Business, Cost-Benefit Analysis of Virtualization
7	<b>Openstack And Its Role In Virtualization (Lectures/practical's : 05)</b> Understanding Openstack, nine Core key components of openstack. CASE

	STUDIES OF VIRTULIZATION : Xen Hypervisor, OpenVZ Hypervisor, MS Virtual Server 2005 R2, Oracle VM
<b>Text Books</b>	<b>References:</b> <ol style="list-style-type: none"> <li>1. “Virtulization” – A Manager’s Guide, By Dan Kusnetzky, O’reilley Publications,</li> <li>2. “Virtulization for Dummies”, 1st Edition, Kindle Edition, by Bernard Golden.</li> </ol>
<b>Reference</b>	Please refer these websites for MOOC’s: NPTEL / Swayam www.edx.com <a href="http://www.coursera.com">www.coursera.com</a>

### ELECTIVE GROUP (01): CLOUD COMPUTING

<b>Subject Name</b>	<b>(01)B -Cloud Computing Services (Amazon Web Services)</b>
<b>No. of Credits</b>	3 Credits (2 Lectures +1 Tutorial)
<b>Pre Requisite</b>	Knowledge of Cloud Computing Concepts Knowledge of Virtualization Knowledge of Cloud security Knowledge of Web technologies Knowledge of IaaS, PaaS, SaaS & DaaS
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	How to provide Flexible and scalable infrastructures as per user requirement
<b>Understanding</b>	Understanding the components of AWS
<b>Applying</b>	Carrying out practical's through AWS
<b>Analyzing</b>	The case studies will help us to understand more of practice of cloud computing in the market.
<b>Evaluating</b>	Comparison of cost-wise solution to the problem and selecting the best solution for the problem suggested to the organization
<b>Creating</b>	Creating flexible and scalable infrastructure suitable to the organizational need
<b>Unit</b>	<b>Contents</b>
1	<b>Cloud Computing Fundamentals (Lectures/practical's : 10)</b> Definition of Cloud Computing , private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, public Vs private clouds
2	<b>Infrastructure &amp; Networking (Lectures/practical's :10)</b> Introduction to Amazon Web Services AWS Global Infrastructure Introduction to Network Switches & Virtual Private Cloud VPC & Subnets Internet Gateways, VPC Peering & NAT Gateways IP Addressing in AWS Understanding AWS Security Groups Launching our first EC2 instance EC2 instance types & Pricing Models
3	<b>Storage (Lectures/practical's : 10)</b> Introduction to Block & Object storage mechanism Introduction to Elastic Block Store - EBS EBS Snapshots EBS Volume Types Instance Store Volumes Introduction to Simple Storage Service (S3) Features of S3
4	<b>Elastic Load Balancers –( Lectures/practical's : 10)</b> Understanding High Availability Configuration ELB Configuration <b>Elasticity</b> Auto Scaling <b>Identity &amp; Access Management</b> Understanding the IAM Policies

	IAM User, IAM Policy and IAM Role
5	<b>Relational Databases(Lectures/practical's : 05)</b> Introduction to Relational Databases Creating our first database structure in MySQL Getting started with DynamoDB
6	<b>Domain Name System(Lectures/practical's : 05)</b> Introduction to DNS Understanding DNS Records Introduction to Route53
7	<b>AWS Lambda and API(Lectures/practical's : 05)</b> Getting started with AWS Lambda Introduction to API Understanding working of API Building our API with API Gateway
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. Cloud Computing: Principles and Pardigms by RajkumarBuyya, jamesBroberg and Andrzej M.Goscinski, Wiley, 2011.</li> <li>2. Amazon Web Services for Dummies – Wiley Brand.</li> <li>3. Learning AWS – Design, Build and Deploy responsive applications using AWS cloud components by Aurobindo Sarkar, Amit Shah</li> </ol>
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1. Learn AWS – David Clinton</li> <li>2. AWS Lab by Zoom Technologies</li> </ol>

### ELECTIVE GROUP (02):DATA SCIENCE

<b>Subject Name</b>	<b>(02)A - Statistical Programming in R</b>
<b>No. of Credits</b>	3 Credits (2 Lectures + 1 Tutorial)
<b>Pre Requisite</b>	Statistical Knowledge required
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To teach the Beginners of R Programming of the a master level. A variety of topics will be covered that are important for Data science in order to prepare the students for real life prediction of data engineering.</li> <li>• To impart knowledge of the concepts related to Probability and Application on data sets. It also gives the idea how data is managed in various environments with emphasis on Predictions measures as implemented in data sets.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>• Remember the definitions of concepts and their Implementation in R.</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>• Understand the concept of data and techniques for its Implementation</li> <li>• Understand data data standards and methods.</li> <li>• Understand the fundamentals of Data science</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>• Design different data behaviors and their Predictions.</li> <li>• Predictions Model Develop.</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>• Analyzing Data set</li> <li>• Studying Historical Data.</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>• Convert the historical Data into Prediction Model.</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>• Write R coding for Prediction Model.</li> </ul>
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction of Probability (8 Lectures)</b> Concept, Types of Probability, Permutation and Combination concept ,Addition and Multiplication Theorem, Condition Probability, Bayes's Theorem
2	<b>Random Variable (5 Lectures)</b> Concept, Discrete and Continuous Random Variable, Probability density function, Mathematical Expectation and their Theorem
3	<b>Data Distribution (7 Lectures)</b> Distribution, Types of Data distribution, Exponential distribution, Binomial distribution, Normal distribution, Poisson distribution, Random number generation, Monte Carlo Simulation.
4	<b>Testing of Hypothesis (5 Lectures)</b> Procedure of Testing Hypothesis, Standard Error and Sampling distribution, Estimation, Student's t-distribution, Chi-Square test and goodness of fit, F-test and analysis of variance. Factor analysis.
5	<b>Introduction to R programming language (5 Lectures)</b> Getting R, Managing R, Arithmetic and Matrix Operations, Introduction to Functions, Control Structures. Working with Objects and Data: Introduction to Objects, Manipulating Objects, Constructing Data Objects, types of Data items, Structure of Data items, Reading and Getting Data, Manipulating Data, Storing Data.
6	<b>Graphical Analysis using R (5 Lectures)</b> Basic Plotting, Manipulating the plotting window, BoxWhisker Plots, Scatter Plots, Pair Plots, Pie Charts, Bar Charts.
7	<b>Advanced R (10 Lectures)</b> Statistical models in R, Correlation and regression analysis, Analysis of Variance (ANOVA), creating data for complex analysis, Summarizing data, and case studies.
<b>Text Books</b>	"Fundamentals of Statistics" Seven Edition By S.C.Gupta

<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1."Fundamentals of Statistics" Seven Edition By S.C.Gupta</li> <li>2.“R Programming Fundamentals by KaelenMedeiras</li> <li>3.“ Reinforcement Learning e-book.</li> <li>4. Learning R Programming Guide on line</li> </ol> <p><b>Suggested MOOC :</b>Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a>, <a href="http://www.coursera.com">www.coursera.com</a></p>
------------------------	---

## ELECTIVE GROUP (02):DATA SCIENCE

<b>Subject Name</b>	<b>(02) B - Introduction to Data Science</b>
<b>No. of Credits</b>	3 Credits (2 Lectures + 1 Tutorial)
<b>Pre Requisite</b>	Statistical and Programming Knowledge required
<b>Course Objectives</b>	<ul style="list-style-type: none"> <li>• To teach the Beginners of Data analysis through R /Python Programming of the a master level. A variety of topics will be covered that are important for Data science in order to prepare the students for real live Project Analysis</li> <li>• To impart knowledge of the concepts related to Machine Learning and implement and variety Application on data sets. It also gives the idea how data is managed in various environments with emphasis on Analysis measures as implemented .</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>• Remember the definitions of concepts and their Programming skills.</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>• Understand the concept of coding and techniques for its Implementation</li> <li>• Understand data different Methods .</li> <li>• Understand the fundamentals of Data science</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>• Design different Model and their validity check.</li> <li>• Concept applying in other domain area.</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>• Analyzing Data set.</li> <li>• Comparing different Model .</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>• Convert the analysis in Modern approaches.</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>• Write R/Python coding for Analysis</li> </ul>
<b>Unit</b>	<b>Contents</b>
1	<b>Association Rule (5 Lectures)</b> Mining Frequent Patterns, Associations, and Correlations: Basic Concepts and a Road Map, Association Rules, the Apriori Algorithm Classification and Prediction
2	<b>Classification (5 Lectures)</b> Classification, Issues Regarding Classification, Classification by Decision Tree Induction, Bayesian Classification, Rule-Based Classification, Metrics for Evaluating Classifier Performance, Holdout Method and Random Sub sampling
3	<b>Prediction (5 Lectures)</b> Prediction, Issues Regarding Prediction, Accuracy and Error Measures, Evaluating the Accuracy of a Classifier or Predictor. Clustering : Cluster Analysis, Agglomerative versus Divisive Hierarchical Clustering, Distance Measures in Algorithmic, Evaluation of Clustering
4	<b>Linear Regression (5 Lectures)</b> Prediction using Linear Regression, Gradient Descent, Linear Regression with one variable, Linear Regression with multiple variables, Polynomial Regression, Feature Scaling/Selection
5	<b>Logistic Regression (5 Lectures)</b> Classification using Logistic Regression, Logistic Regression vs. Linear Regression, Logistic Regression with one variable and with multiple variables
6	<b>Deep Learning (10 Lectures)</b> History, Scope and specification, why deep learning now, building block of neural network, neural networks, Deep learning hardware. Backward and forward neural networks, XOR model, cost function estimation (maximum likelihood), units, activation functions, layers, , normalization, hyper-parameter tuning, Convolution neural networks, architecture

7	<b>Case study (10 Lectures)</b> Iris Data set ,Loan Data set, Titanic survival Data set ,Share Market Data set, Covide -19 Data set etc
<b>Text Books</b>	<b>An Introduction to Machine Learning Springer by Gopinath Rebala</b>
<b>Reference Books</b>	1. Fundamentals of Statistics" Seventh Edition By S.C.Gupta 2. <b>An Introduction to Machine Learning Springer by Gopinath Rebala</b> 3. <b>Deep Learning MIT Press by John D. Kelleher.</b> <b>Suggested MOOC :</b> Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a> , <a href="http://www.coursera.com">www.coursera.com</a>

### ELECTIVE GROUP (03): LINUX

<b>Subject Name</b>	<b>(03)A- Linux Desktop Environment, Shell Programming and System Administration</b>
<b>No. of Credits</b>	<b>3 Credits</b>
<b>Pre Requisite</b>	Knowledge of any operating system
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Linux Architecture and Shell Commands
<b>Understanding</b>	Understanding of Linux operating system and environment
<b>Applying</b>	Use Linux operating system for configuring the environment.
<b>Analyzing</b>	
<b>Evaluating</b>	Writing shell scripts and evaluating them
<b>Creating</b>	Creating small applications for smart home/city using Arduino
<b>Unit</b>	<b>Contents</b>
1	<b>Linux Installation (8 Lectures)</b> <b>Using Shell Interface:</b> <ul style="list-style-type: none"> <li>▪ Introduction to Linux</li> <li>▪ Internal and external commands</li> <li>▪ General purpose utilities</li> <li>▪ Navigating the file system</li> <li>▪ Handling ordinary files</li> </ul> <b>Using GUI Environments:</b> <ul style="list-style-type: none"> <li>▪ GNOME desktop environment</li> <li>▪ KDE desktop environment</li> </ul>
2	<b>Using open source office suite (8 Lectures)</b> <ul style="list-style-type: none"> <li>▪ Word processor application</li> <li>▪ Spreadsheet application</li> <li>▪ Presentation application</li> <li>▪ Desktop database application</li> </ul> <b>Using the Internet</b> <ul style="list-style-type: none"> <li>▪ World wide web</li> <li>▪ FTP</li> <li>▪ Telnet</li> </ul> <b>Using Multimedia</b> <ul style="list-style-type: none"> <li>▪ Graphics</li> <li>▪ AudioVideo</li> </ul>
3	<b>Introduction to shell (8 Lectures)</b> <ul style="list-style-type: none"> <li>▪ Introduction to ‘bash’ shell</li> <li>▪ Redirection</li> <li>▪ Pipes</li> <li>▪ Tees</li> <li>▪ Command substitution</li> <li>▪ Introduction to other shells: Korn shell, C Shell etc.</li> </ul> <b>Shell environment</b> <ul style="list-style-type: none"> <li>▪ Shell variables</li> <li>▪ Handling the command line arguments</li> <li>▪ Login scripts</li> <li>▪ Terminal characteristics</li> <li>▪ Aliases</li> </ul>

	<b>Text editors</b> 'vi' editor , 'emacs' editor
4	<b>Shell commands (5 Lectures)</b> <ul style="list-style-type: none"> <li>General purpose utilities</li> <li>File management</li> <li>Process management</li> <li>Communication management</li> </ul> <b>Regular expressions</b> <ul style="list-style-type: none"> <li>Pattern matching</li> <li>Wild cards</li> <li>Regular expressions</li> <li>Utilities: grep, egrep, fgrep etc.</li> </ul> <b>Filters</b> <ul style="list-style-type: none"> <li>Introduction to filters</li> </ul> Utilities: pr, head, tail, cut, paste, sort, uniq, nl, tr etc.
5	<b>Shell scripting (6 Lectures)</b> <ul style="list-style-type: none"> <li>Introduction to shell scripting</li> <li>Programming constructs</li> <li>Mathematical operators</li> <li>Logical operators</li> <li>String manipulation</li> <li>Interactive scripts</li> </ul> Handling command line arguments
6	<b>Understanding system administration (6 Lectures)</b> <ul style="list-style-type: none"> <li>Introduction to the routine activities in system administration</li> <li>Shell commands for system administration</li> <li>Administrative tools</li> </ul> Managing file systems and disk space
7	<b>Setting up and supporting users (8 Lectures)</b> <ul style="list-style-type: none"> <li>Managing user accounts</li> <li>Providing support to the users</li> </ul> <b>Automating system tasks:</b> <ul style="list-style-type: none"> <li>Aut System initialization</li> <li>System startup and shutdown</li> <li>Scheduling system tasks</li> </ul> <b>Backing up and restoring files:</b> <ul style="list-style-type: none"> <li>Backup and restore strategy</li> <li>Backup and restore tools</li> </ul> <b>Computer security issues:</b> <ul style="list-style-type: none"> <li>Password protection</li> </ul> FirewallsImplement one small project
<b>Text Books</b>	<b>Textbook:</b> <ul style="list-style-type: none"> <li>Red Hat Linux Bible: Fedora and Enterprise Edition - by Christopher Negus</li> </ul>
<b>Reference Books</b>	UNIX Concepts and Applications - by Sumitabha Das
<b>MOOC on NPTEL</b>	

### ELECTIVE GROUP (03): LINUX

<b>Subject Name</b>	<b>(03)B –Linux Linux Internals and Network Administration</b>
<b>No. of Credits</b>	<b>3</b>
<b>Pre Requisite</b>	Basics of Operating System
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Remembering Linux Internal and Network Management commands
<b>Understanding</b>	Understanding of Linux operating system and Network administration.
<b>Applying</b>	Creating Proxy, server, File server, web server
<b>Analyzing</b>	Analyzing inter process communication
<b>Evaluating</b>	Performance of different servers
<b>Creating</b>	Use of Linux administration for creation of server and management
<b>Unit</b>	<b>Contents</b>
1	<b>Setup And Manage a Local Area Network (8 Lectures)</b> Basic Networking, Introduction to networking, OSI Model, IP addressing (IPV4, IPV6) & LAN establishment with Linux , Configuring internet in Linux through broadband, dial-up, data card & through mobile (gprs). <b>Setup And Manage Proxy Server :</b> Basics of proxy services, Configuring proxy services, Creating ACL's for controlling access to internet, SQUID: Proxy server setup, Blocking Websites, content filtering, Bandwidth Management
2	<b>Setup And Manage FILE Server (8 Lectures)</b> NFS: network file sharing & resource sharing across Linux environment. YUM server: Setting up local YUM, FTP YUM, HTTP YUM, EPEL, REMI & RPMForge like YUM configuration, DHCP: Dynamic Host Configuration Protocol setting up, Allocating IP, Subnet mask, default gateway and hostname, communication with DNS and other protocols. <b>Setup And Manage FTP Server</b>
3	<b>Setup And Manage Web Server (8 Lectures)</b> Basics of Web Services, Introduction to Apache, Configuring Apache for main site, Configuring Apache for multiple sites using IP-based, port based and name-based, Web Server: Apache installation, configuring dedicated server, shared server, user based authentication, load balancing and apache tuning. NIS, LDAP: (user's liberty to sit into remote machine) MAIL Server: knowing MUA, MTA & MDA, setting up and configuring POSTFIX, POP3s v/s IMAPs, Squirrel mail, accessing via Outlook, Thunderbird and evolution. Multi/virtual domain management, email security. Postfix Administration.
4	<b>Setup And Manage boot Server (5 Lectures)</b> What is booting and boot process of Linux?, Init Process or Run levels <b>Setup And Manage DNS Server :</b> Basics of Internet, Basics of DNS and BIND 9, Configuring DNS primary server, DNS: master DNS, slave DNS with forward & reverse zone, one DNS resolving multiple domain, dynamic DNS etc
5	<b>(6 Lectures)</b> Architecture of Linux, User and Kernel Space, Introduction to System Calls, System Calls in Detail, trace – Tracing system calls. <b>Process management</b> Introduction to Process and process attributes, process vs. Program, Process States, Creating Process, Process termination, process commands Special case of processes.

	<b>Inter Process Communication</b> Introduction to IPC, Pipe, FIFO, Shared Memory, Advantages and Disadvantages of various IPC mechanisms, Application of IPC
6	<b>Working with Signals and Threads (6 Lectures)</b> <b>Thread and Process Synchronization</b> Threads and resources management, Race condition in multi-threaded applications, writing thread safe code, Mutex, POSIX Semaphores, Usage of Binary semaphores and Mutex Race condition in multi-process applications, Limitations of shared memory, Semaphore Implementation
7	<b>Linux Networking (8 Lectures)</b> OSI and TCP/IP models, Addressing in TCP/IP, IPv4 and IPv6 differences, TCP three-way handshake, Network packet analysis in Linux, Networking commands in Linux, Using socket API to implement client server communication, Working with TCP and UDP sockets, Synchronous I/O
<b>Text Books</b>	1. Linux Administration : A Beginner's Guide, Shah, TMH 2. LINUX: The Complete Reference, Petersen, TMH 3. LINUX Network Administrator's Guide, Kirch, SPD/O'REILLY
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/105/106105166/">https://nptel.ac.in/courses/106/105/106105166/</a>

### ELECTIVE GROUP (04):OPEN SOURCE TECHNOLOGIES

<b>Subject Name</b>	<b>(04) A. Perl Scripting</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	
<b>Course Objectives</b>	<b>Course Objective :</b> <ul style="list-style-type: none"> <li>To introduce basic concepts of Perl Programming and write, modify, and run simple Perl scripts and study working with files and using perl as an object oriented language</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of Perl scripting terminology for development of applications for organization .
<b>Understanding</b>	By remembering students will understand concepts of perl language and how to develop and implement various types of programs as per need of organization
<b>Applying</b>	Students will Have thorough knowledge about programming of Perl.
<b>Analyzing</b>	Students will acquire a good knowledge of programming with perl. Student will be able to pursue his study in object oriented concepts also using perl.
<b>Evaluating</b>	Ability to select proper programming concept to design applications to solve real world problem.
<b>Creating</b>	Design and create ir own applications using procedures, functions, file handling & OOP objects.
<b>References (Books, Websites etc) :</b> <ul style="list-style-type: none"> <li>Mastering Perl : Brian, O'Reilly</li> <li><a href="http://www.tutorialspoint.com/perl/index.htm">www.tutorialspoint.com/perl/index.htm</a></li> </ul>	
<b>Suggested MOOC :</b> Swayam	
<b>Course Plan</b>	
<b>Unit</b>	<b>Contents</b>
1	<b>Perl – Introduction</b> What is Perl? Perl features , Perl – Syntax Overview, Perl – Data Types , Numeric Literals String Literals , Perl – Variables , Creating Variables, Perl– Scalars, Scalar Operations ,Perl – Arrays Perl – Hashes
2	<b>Control Flow and Looping Statement</b> if statement , if else statement, if elsif else statement, unless statement, switch statement, ? : Operator <b>Perl – Loops :</b> while loop , until loop, for loop, For each loop do while loop nested loops, next statement, last statement, continue statement, redo statement, go to statement, Infinite Loop
3	<b>Perl – Operators</b> What is an Operator? Perl Arithmetic Operators, Perl Equality Operators, Perl Assignment Operators, Perl Bitwise Operators, Perl Logical Operators, Quote-like Operators, Perl – Date and Time, GMT Time Format, Date & Time, Epoch time, POSIX Function strftime()
4	<b>Perl – Subroutines</b> Define and Call a Subroutine, Passing Arguments to a Subroutine, Passing Lists to Subroutines, Passing Hashes to Subroutines, Returning Value from a Subroutine, Private Variables in a Subroutine, Temporary Values via local(), State Variables via state() Subroutine, Call Context <b>Perl – References :</b> Create References Dereferencing Circular References, References to

	<p>Functions</p> <p>Perl — Formats Define a Format Using Format, Define a Report Header Number of Lines on a Page, Define a Report Footer , String and Mathematical Functions</p>
5	<p><b>Perl — File I/O</b></p> <p>Opening and Closing Files, Open Function, Sysopen Function, Close Function, Operator getc Function, read Function, print Function, Copying Files Renaming a file, Deleting an Existing File Positioning inside a File</p> <p><b>Perl — Directories :</b>Display all Files, Create new Directory, Remove a directory, Change a Directory</p>
6	<p><b>Perl — Regular Expressions</b></p> <p>Pattern Matching, Match Operator Match Operator Modifiers Matching Only Once Regular Expression Variables. Substitution Operator Substitution Operator Modifiers. Translation Operator Translation Operator Modifiers More Complex Regular Expressions Matching Boundaries Selecting Alternatives Grouping Matching. \G Assertion Regular-expression Examples</p>
7	<p><b>Introduction to Object Oriented Programming in Perl</b></p> <p>Object Basics, Defining a Class Creating and Using Objects, Defining Methods, Inheritance Method Overriding , Default Auto loading, Destructors and Garbage Collection, Object Oriented Perl Example</p>

### ELECTIVE GROUP (04):OPEN SOURCE TECHNOLOGIES

<b>Subject Name</b>	<b>(04 )B- Ruby</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	
<b>Course Objectives</b>	<b>Course Objective :</b> <ul style="list-style-type: none"> <li>• Main objective of this paper is to learn, object-oriented programming with Ruby, Rails fundamentals and how to create basic online applications. How to work with HTML controls, use models in Rails applications, and work with sessions. Details on working with databases and creating, editing and deleting database records, Methods for handling cookies and filters and for caching pages.</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of Ruby scripting for development of applications for organization .
<b>Understanding</b>	By remembering students will understand concepts of ruby rails and how to develop and implement various types of programs as per need of organization
<b>Applying</b>	Students will Have thorough knowledge about object-oriented programming with Ruby.
<b>Analyzing</b>	Students will acquire a good knowledge of programming with HTML controls, use models in Rails applications, and work with sessions. Student will be able to pursue his study in object oriented concepts for online application development..
<b>Evaluating</b>	Ability to select proper programming concept to design applications to solve real world problem.
<b>Creating</b>	Design and create ir own applications using OOP objects & rails application developement.
<b>References (Books, Websites etc.):</b> <ul style="list-style-type: none"> <li>• Programming Ruby: Pragmatic Programmers' Guide, Second Edition</li> <li>• Agile Web Development with Rails, Third Edition</li> <li>• <a href="http://www.webtechlearning.com">www.webtechlearning.com</a></li> </ul>	
<b>Suggested MOOC :</b> SWAYAM	
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction to Ruby</b> Creating a first web application, getting started with Ruby, Checking ruby documentation, working with numbers in ruby, working with strings in ruby.
2	<b>Variables and Constants in Ruby</b> Storing data in variables, creating constants, interpolating variables in Double-Quoted strings, reading text on command line, creating symbols in ruby, working with operators, Handling operator precedence, working with Arrays, using Two Array Indices, working with Hashes, working with ranges.
3	<b>Conditional Loops, Methods and Blocks</b> If Statement, Using case statement, using loops, creating and calling a method, making use of Scope, working with Blocks
4	<b>Classes:</b> creating a class, creating an object Data Encapsulation, Data Abstraction, Polymorphism, Inheritance
5	<b>Objects</b> Understanding Ruby's object Access, overriding method, creating class variables, creating class

	methods, creating Modules, creating Mixins
6	<b>Rails</b> Putting Ruby to Rails, introducing Model View Controller Architecture, giving view something to do, mixing ruby code and HTML inside view, passing data from an action to a view, escaping sensitive text, adding a second action.
7	<b>Building Simple Rails Applications</b> Accessing data user provides, using rails shortcuts for HTML controls, working with models, tying controls to models, initializing data in controls, storing data in sessions

### ELECTIVE GROUP (05): MOBILE COMPUTING

<b>Subject Name</b>	<b>(05) A- JavaScript Programming</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Basic Knowledge about website development.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of programming be understood and remembered .
<b>Understanding</b>	By remembering students the basing concepts students will understand the concepts of programming structure
<b>Applying</b>	Students willHave thorough knowledge about website working
<b>Analyzing</b>	To study the form elements and its working
<b>Evaluating</b>	Ability to select proper functionality of a page and form.
<b>Creating</b>	Design and create their own websites with proper validation
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction to Javascript (5 Lectures)</b> JavaScript Overview , JavaScript Programming Basics, <b>Variables and Operators</b> : Variables and Data Types , Operators , Array
2	<b>Control Statements (5 Lectures)</b> Controlling the Flow: JavaScript Control Statements, <b>Functions</b> : Parameters and working, <b>The Window Object</b> : The Window Object, Dialog Boxes ,Window function
3	<b>The Document Object (4 Lectures)</b> The Document Object, Writing to Documents, Document related functions <b>Forms and Forms-based Data</b> : The Form Object , Working with Form Elements and Their Properties ,Event related with form
4	<b>Form Validation (4 Lectures)</b> A Process, Testing Data , Preparing Data for Validation and Reporting Results, Validating Non-text Form.
5	<b>Frames: (6 Lectures)</b> HTML Frames Review, Scripting for Frames <b>The String and RegExpObjects</b> : The String Object, Properties and methods of String Object, Using String Object Methods to Correct Data Entry Errors, The RegExp Object <b>Dates and Math:</b> The Date Object, Properties and methods of Date Object, The Math Object , Properties and methods of Math Object
6	<b>AJAX (8 Lectures)</b> <b>Animation:</b> Frequently used Animation function, Manual and Automated animation. <b>AJAX:</b> Introduction to AJAX, Interacting with the Web Server using XMLHttpRequest Object, Need of Web server
7	<b>JS Frameworks &amp; Libraries (8 Lectures)</b> Need of JSON , RESTful API with JSON, jQuery, Intro ,Effects and animations DOM/HTML Updates,jQuery and Ajax
<b>Reference Books</b>	1.JavaScript and JQuery: Interactive Front-End Web Development, by Jon Duckett 2.JavaScript: The Definitive Guide, by David Flanagan 3.Learn JavaScript VISUALLY, by IvelinDemirov
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/105/106105084/">https://nptel.ac.in/courses/106/105/106105084/</a> <a href="https://youtu.be/uUhOEj4z8Fo">https://youtu.be/uUhOEj4z8Fo</a>

### ELECTIVE GROUP (05): MOBILE COMPUTING

<b>Subject Name</b>	<b>(05)B - Android</b>
<b>No. of Credits</b>	3 Credits (2 Lectures + 1 Tutorial)
<b>Pre Requisite</b>	Basic Knowledge about Java language
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of programming with GUI .
<b>Understanding</b>	By remembering students the basing concepts students will understand the concepts of program structure with layout
<b>Applying</b>	Students willHave thorough knowledge how programming affects on layout, output design.
<b>Analyzing</b>	To see various parts of design and its elements
<b>Evaluating</b>	Ability to create effective layout.
<b>Creating</b>	Design and create their own screen with proper view.
<b>Unit</b>	<b>Contents</b>
1	<b>Introduction to Android (5 Lectures)</b> Evolution of Android ,Advantages of Android, SDK Tools for Android <b>Overview of Android Platform :</b> Android Development IDE Understand the Working of Android, The Android Application Framework, Screen Layout Design, User Interface Design, Introduction to Graphics and Animation Design, Interactivity, Introduction to Content Providers, Intent and Intent Filters
2	<b>Android Development Environment (8 Lectures)</b> <b>Setting up the Android Development Environment :</b> Installing Android Development Environment, Updating the Android SDK Setting up AVDs and Smartphone Connections <b>Introduction to the Android Software Development Platform :</b> Understanding Java SE and Dalvik Machine, The Directory Structure of an Android Project, Android XML, Android Application Resources ,Launching an Android Application, Creating first Hello Application
3	<b>Overview of Android Framework (7 Lectures)</b> Overview of Object Oriented Programming, Overview of XML The Anatomy of an Android Application, Components of an Android Application, Android Intent Objects, Android Manifest XML
4	<b>Screen Layout Design (7 Lectures)</b> Android View Hierarchies, Activity Lifecycle, Defining Screen Layouts (Screen size, pixel density) <b>User Interface Design:</b> Using Common UI Elements, Using Menus in Android , Adding Dialogs(Date picker, Time picker, Custom Dialog, Alert Dialog
5	<b>Introduction to Graphics Resources (7 Lectures)</b> Introduction to Drawables, Using Bitmap Images, Using Transitions, Creating 9-Patch Custom Scalable Images, Playing Video in Android Apps <b>Handling User Interface Events:</b> An Overview of UI Events, Handling onClick Events for all Views, Android Touch-screen Events: onTouch Touch-screen's Right-Click Equivalent: onLongClick, Keyboard Event Listeners: onKeyUp, onKeyDown, Context Menus: onCreateContextMenu, Controlling the Focus
6	<b>(8 Lectures)</b>

	<b>Understanding Content Providers:</b> An Overview of Android Content Providers, defining a Content Provider, Working with a Database <b>Intents and Intent Filters :</b> Understanding the Intents, Android Intent Messaging via Intent Objects, Intent Resolution, Using Intents with Activities, Android Services, Using Intents with Broadcast Receivers
7	<b>Bars and Views (8 Lectures)</b> Action Bar, Toolbar, Navigation Drawer, TextView, EditText, Button, WebView, ImageView ,ListViewetc
<b>Reference Books</b>	1.Android Application Development All-in-One For Dummies- Barry A. Burd 2.Android Programming: The Big Nerd Ranch Guide Programming Android: 3.Java Programming for the New Generation of Mobile Devices- Authors: Zigurd R. Mednieks, Laird Dornin, G. Blake Meike, Masumi Nakamura
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/106/106106147/">https://nptel.ac.in/courses/106/106/106106147/</a> <a href="https://youtu.be/bBt5sTXaOJA">https://youtu.be/bBt5sTXaOJA</a>

### ELECTIVE GROUP (06): DOT NET TECHNOLOGIES

<b>Subject Name:</b>	<b>(06) A- C# Programming and Applications</b>
<b>No. of Credits:</b>	3 Credits ( 2 Lectures + 1 Tutorial)
<b>Pre Requisite:</b>	Basic Knowledge of Object-Oriented Programming, Event Driven Programming was and Database Applications.
<b>Cognitive Abilities:</b>	Course Outcome as per Blooms Taxonomy
<b>Remembering:</b>	Using basic concepts of object-oriented programming, event driven programming and database application programming in C# can be understood and remembered.
<b>Understanding:</b>	By remembering basic concepts students can understand how to work with programming in C#. Students need to understand programming structures of OOP in C#. Needs to understand methods and properties of various controls of windows forms application along with database objects and their methods.
<b>Applying:</b>	Students will have detailed knowledge of Abstraction, Inheritance, Polymorphism, Encapsulation, Exception Handling, Windows forms applications and database applications
<b>Evaluating:</b>	Students will have ability to use proper methods of C# to solve object oriented problems.
<b>Creating:</b>	Students can apply the concepts of C# programming to create console based and windows based applications.
<b>Unit No</b>	<b>Contents</b>
<b>1</b>	<b>Introduction to C#: (7 Lectures)</b> Programming Features of C#, Keywords in C#, Namespaces, Data Types, Variables, Operators, Type Conversions, The '?:' Operator, Control Statements. Methods, Passing Method Parameters, Method Overloading, Array, ArrayList class, String Methods, foreach loop.
<b>2</b>	<b>Classes and Objects: (7 Lectures)</b> Basic Principles of OOP, Define a Class, Member Access Modifiers, Constructors, Types of Constructors (Default Constructor, Overloaded Constructor, Static Constructor, Private Constructor and Copy Constructor), Destructors, 'this' Reference, Constant Members, Properties, Auto Implemented Properties, Object_INITIALIZER, Collection_INITIALIZER, Anonymous Types, Extension Methods, Partial Class, Partial Methods, Indexers.
<b>3</b>	<b>Inheritance and Polymorphism: (8 Lectures)</b> Define Inheritance, Types of Inheritance, Method Overriding, Abstract Class, Abstract Methods, Sealed Class and Methods, Define Polymorphism, Static Polymorphism: Function Overloading Operator

	Overloading, Overloadable and Nonoverloadable Operators, Dynamic Polymorphism, Defining Interface, Extending interface, Interface and Inheritance, Explicit Interface.
<b>4</b>	<b>Errors and Exception Handling: (7 Lectures)</b> Types of Errors, Exceptions, Syntax for Exceptions Handling Code, Multiple catch Statements, finally Statement, Nested try Block, Throwing Our Own Exception.
<b>5</b>	<b>Working with Windows Form Controls: (7 Lectures)</b> Properties, Events and Examples of: Button, Label, LinkLabel, TextBox, RichTextBox, ListBox, ListView, ComboBox, RadioButton, CheckBox, CheckedListBox, DateTimePicker, PictureBox, Timer, ProgressBar, TrackBar, HScrollBar, VScrollBar.
<b>6</b>	<b>Menus, MDI and Containers: (7 Lectures)</b> ContextMenuStrip, MenuStrip, StatusStrip, ToolStrip, SDI and MDI, Visual Inheritance, GroupBox, Panel, TreeView, SplitContainer, TabControl Example.
<b>7</b>	<b>Data Access and Data Bindings: (7 Lectures)</b> ADO.NET Overview, .NET Data Providers, ADO.Net Objects, Connections, Commands, Data Adapters, Data Readers , Data Sets , Data Tables , Data Views , Data Bindings, Reports.
<b>References (Books, Websites etc)</b>	<ul style="list-style-type: none"> <li>• C#: The Complete Reference, McGraw-Hill Osborne Media- Herbert Schildt.</li> <li>• C # Programming- Wrox publication.</li> <li>• Programming in C# -A Primer. E. Balaguru</li> </ul>
<b>Suggested MOOC:</b>	1) Coursera ( <a href="http://www.coursera.org">www.coursera.org</a> ) 2) mymooc ( <a href="http://www.my-mooc.com">www.my-mooc.com</a> ) 3) Class Central ( <a href="http://www.class-central.com">www.class-central.com</a> ) 4) edX ( <a href="http://www.edx.org">www.edx.org</a> ) 5) Mooc List ( <a href="http://www.mooc-list.com">www.mooc-list.com</a> )

### ELECTIVE GROUP (06): DOT NET TECHNOLOGIES

<b>Subject Name:</b>	<b>(06)B-ASP.Net with MVC</b>
<b>No. of Credits:</b>	3 Credits
<b>Pre Requisite:</b>	Basic Knowledge of Website Development, JavaScript, Validations, State Management etc..
<b>Cognitive Abilities:</b>	Course Outcome as per Blooms Taxonomy
<b>Remembering:</b>	Using basic concepts of website development, methods and properties ASP. Net in C# can be understood and remembered.
<b>Understanding:</b>	By remembering basic concepts students can understand how to work with web designing in C#. Students need to understand methods and properties of various client and server side controls. Working of state management is also needs to understand.
<b>Applying:</b>	Students will have detailed knowledge of Website design and development, validation, state management, use of web parts and Ajax controls.
<b>Evaluating:</b>	Students will have ability to use proper client side and server side controls of C# to design modern web design.
<b>Creating:</b>	Students can apply the concepts of C# programming for designing a programs for desktop or mobile, as well as web application.
<b>Unit No.</b>	<b>Contents</b>
<b>1</b>	<b>Introduction to ASP.Net:</b> Introduction to ASP.Net, ASP.Net Architecture, ASP.Net Page Life Cycle, Page Life Cycle Events, ASP.Net Directives., FileUpload Control, Calendar Control, AdRotator Control, MultiView Control, and Wizard Control Examples, Validation Controls, Menu, SiteMapPath, TreeView Control.
<b>2</b>	<b>Master Pages, CSS, and JavaScript:</b> Working With Master Pages, Nested Master Pages, CSS Overview, Adding Style Sheets into, Web Pages, Editing Styles, Applying Styles to Master Pages, Applying Styles to Web Page, JavaScript Overview, Adding JavaScript files into ASP.Net, Editing JavaScript Files, Applying JavaScripts to Master Pages, Applying JavaScripts to WebPage.
<b>3</b>	<b>State Management:</b> View State, Hidden Field, Session State, Application State, QueryString, HttpContext, Cookies, Caching, Types of Caching.
<b>4</b>	<b>Data Access in ASP.Net:</b> Data Source Controls, DataList, DataPager, GridView, DetailsView, FormView,

	Object Data Sources, ListView, DataPager, Repeater.
<b>5</b>	<b>ASP. Net Web Parts:</b> Introduction, Advantages of Web Parts, WebPartsManager, CatalogPart, PageCatalogPart, EditorPart, WebPartZone,, EditorZone, CatalogZone Controls.
<b>6</b>	<b>Ajax Controls:</b> AJAX control toolkit, Building a ASP.NET Page with AjaxScriptManager Control, UpdatePanel Control, UpdateProgress Control, Timer Control
<b>7</b>	<b>Working with MVC:</b> Introduction to .Net MVC Framework, MVC Framework Features, MVC Architecture, MVC Components, MVC Application Folders, Configuration files- global.asax, packages.config, web.config, Working with Views, Woking with Controls.
<b>Reference Books:</b>	<ul style="list-style-type: none"> <li>• ASP.Net: The Complete Reference, Matthew MacDonald</li> <li>• Professional ASP.Net (4/4.5) in C #- Wrox publication</li> </ul>
<b>Suggested MOOC:</b>	1) Coursera ( <a href="http://www.coursera.org">www.coursera.org</a> ) 2) mymooc ( <a href="http://www.my-mooc.com">www.my-mooc.com</a> ) 3) Class Central ( <a href="http://www.class-central.com">www.class-central.com</a> ) 4) edX ( <a href="http://www.edx.org">www.edx.org</a> ) 5) Mooc List ( <a href="http://www.mooc-list.com">www.mooc-list.com</a> )

### ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES

<b>Subject Name</b>	<b>(07)-A HTML 5.0</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Basic concepts of Languages and HTML tags with functions.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Understand the Concepts of HTML 5 & the Applications of HTML 5 to Website Development.
<b>Understanding</b>	By remembering students the basic concepts of HTML and the applications of advanced features of HTML 5. 0 for web development. .
<b>Applying</b>	Students will Have thorough knowledge about practical approach in designing website for various business applications..
<b>Analyzing</b>	To Measure the knowledge about website development and practical applications of advanced features to the web applications
<b>Evaluating</b>	Ability to select proper method to use better tools for website development using HTML 5.0 features and apply security measures to the websites also use useful functions of HTML 5.0
<b>Creating</b>	Design and Develop Websites for various Business Applications. Check information inputted into a Database and validate it.
<b>Unit No</b>	<b>Contents</b>
<b>1</b>	<b>Introduction to HTML: (7 Lectures)</b> MIME Types, Standards for the Internet, Evolution of HTML, Introduction to XHTML, Introduction to Working Group, W3C
<b>2</b>	<b>Features of HTML5: (6 Lectures)</b> Detection of HTML5 Support, Modernizr: An HTML5 Detection Library, Canvas, Canvas , Text, Video, Video Formats, Local Storage, Web Workers, Offline Web Applications, Geolocation, Input Types, Placeholder Text, Form Autofocus, Microdata
<b>3</b>	<b>Elements of HTML5: (7 Lectures)</b> The Doctype, The Root Element, The <head> Element, New Semantic Elements in HTML5, Handling of Unknown Elements by the Browsers, Headers, Articles, Dates and Times, Navigation, Footers
<b>4</b>	<b>Drawing Surface: (7 Lectures)</b> Introduction to Canvas, Simple Shapes, Canvas Coordinates, Paths, Text, Gradients, Images
<b>5</b>	<b>Video on the web (6 Lectures)</b> Video Containers, Video Codecs, Audio Codecs
<b>6</b>	<b>Geolocation and Local Storage for Web Applications (7 Lectures)</b> Geolocation API, Handling Errors, geo.js Library, Evolution of Local Storage, Introduction to HTML5 Storage
<b>7</b>	<b>Web Forms and Offline Web Application (6 Lectures)</b> Introduction to Web Forms, Placeholder Text, Autofocus Field, e-Mail, Addresses, Web Addresses, Numbers as Spinboxes, Numbers as Sliders, Date Pickers, Search Boxes, Color Pickers, Introduction to Offline Web application, The CacheManifest
<b>Text Books</b>	1. .Anil Gaikwad , JyotiBiradar (Patil) Basic Concepts of System Analysis Lambert Academic Publication Dec. 2019 .

	2. Brian Albers, Frank Salim, and Peter Lubbers “Pro HTML 5.0 Programming
<b>Reference Books</b>	1. Bruce Lawson, Remy Sharp –Introducing HTML 5.0 –Google Books 2010. 2. Jeffrey Zeldman and Jeremy Keith “HTML 5 for Web designers – GoogleBooks-2010. 3. Christopher Murphy, DivyaManian, and Richard Clark :Beginning HTML5 and CSS3.2012. 4. Anil Gaikwad ,JyotiBiradar (Patil) Software Project Management Made Easy Lambert Academic Publication 2019 Dec .
<b>MOOC on NPTEL</b>	Please refer these websites for MOOC’s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>

### ELECTIVE GROUP (07): NET CENTRIC TECHNOLOGIES

<b>Subject Name</b>	<b>(07) B - AJAX PROGRAMMING</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Basic concepts of Languages and HTML tags with functions.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Understand the Concepts of Basic Programming skills and how to use AJAX Programming for software development .
<b>Understanding</b>	Understand the Concepts of AJAX Programming & the Applications of AJAX to WebsiteDevelopment. Design and Develop Websites for various Business Applications using AJAXProgramming. Check information and handle database inwebsites..
<b>Applying</b>	Students will Have thorough knowledge about practical approach in AJAX rogramming language for Software development .
<b>Analyzing</b>	Computer programming detail knowledge , An intermediate knowledge on Programming Languages and its structure for developing professional web applications for business organizations.
<b>Evaluating</b>	Ability to select proper method to use better tools for website development using AJAX programming language . Use maximum features of AJAX language and know the details about security features of the language .
<b>Creating</b>	Design and Develop Web applications or web sites for various BusinessApplications.
<b>Unit No</b>	<b>Contents</b>
<b>1</b>	<b>Introduction to AJAX (6 Lectures)</b> Introduction to Web Architecture, Traditional Web Communication Processes and Technologies , Introduction to AJAX
<b>2</b>	<b>Interacting with the Web Server using XMLHttpRequest Object: (7 Lectures)</b> Introduction to Interaction with Web Server, Create an XMLHttpRequest Object, Interact with the Web Server
<b>3</b>	<b>Working with PHP and AJAX: (6 Lectures)</b> Introduction to PHP , Process Client Requests , Accessing Files Using PHP
<b>4</b>	<b>Manipulating XML Data: (7 Lectures)</b> Basics of XML , Create an XML Document Using DOM , Retrieve Data from XML
<b>5</b>	<b>Working with XSLT and AJAX: (7 Lectures)</b> Basics of XSLT , Transform Responses Using XSLT
<b>6</b>	<b>Working with JSON: (6 Lectures)</b> Introduction to JSON Format, Create Data in JSON Format , Implement JSON on the Server Side scripting.
<b>7</b>	<b>Using Frameworks in AJAX: (6 Lectures)</b> Understand AJAX Frameworks , Use Prototype and Script.aculo.us , Use jQuery <b>Applying Basic AJAX Techniques</b> Download Images Using AJAX, Auto-Populate Select Boxes

	<b>Implementing Security and Accessibility in AJAX Applications</b> Create Secure AJAX Applications , Create Accessible Rich Internet Applications
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. Anil Gaikwad ,JyotiBirada (Patil) Basic Concepts of System Analysis Lambert Academic Publication Dec. 2019 .</li> <li>2. Brian Albers, Frank Salim, and Peter Lubbers “Pro HTML 5.0Programming.</li> </ol>
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1. Ajax: The Definitive Guide: Interactive Applications by Anthony T. Holdener-2014.</li> <li>2 Kris Hadlock “Ajax for Web Developers Amazon Books2012.</li> <li>3 Ajax: The Complete Reference by Thomas A. Powell-Amazon Books2013</li> <li>4. Anil Gaikwad ,JyotiBiradar (Patil) Software Project Management Made Easy Lambert Academic Publication Dec. 2019</li> </ol>
<b>MOOC on NPTEL</b>	Please refer these websites for MOOC"s: NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a> Website :- <a href="https://www.amazon.com/Learn-JavaScript-Ajax-w3Schools-W3Schools/dp/0470611944/">https://www.amazon.com/Learn-JavaScript-Ajax-w3Schools-W3Schools/dp/0470611944/</a>

### ELECTIVE GROUP (08): INFORMATION SYSTEMS

<b>Subject Name</b>	<b>(08) A -Recommender System</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Basic Knowledge about Relational Database Management system and Software Development , Knowledge about Business Organizations and its functions , Theory of Recommender Systems and Decision Making process .
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of software databases ,development stages and software development also software engineering Information can be understood and remembered .
<b>Understanding</b>	By remembering students the basing concepts students will understand the concepts of Recommender system , Internet and database concepts .
<b>Applying</b>	Students will Have thorough knowledge about practical approach in database design and design the recommender systems for business applications
<b>Analyzing</b>	To Measure the Information systems applications with respect to business benefits . reduce the risk of decision making
<b>Evaluating</b>	Ability to select proper method to use proper recommender system for business applications and make it useful for business functions.
<b>Creating</b>	Design and create own recommender system as per the requirements of the business and functions of the business After going through this course a student should be able to understand : <ul style="list-style-type: none"> <li>• Will be able to understand the concepts of Decision MakingProcess.</li> <li>• Can be able to design and develop Recommender for Businessapplications.</li> </ul> Implementation of Recommender System for various areas of Interest in Business Organizations.
<b>Unit No</b>	<b>Syllabus contents</b>
<b>1</b>	<b>:Introduction to Basic Concepts:</b> Collaborative Recommendation: User Based Nearest Neighbor recommendation, Item Based Nearest Neighbor recommendation, model based and pre-processing based approaches. Recent practical approaches and systems. Content based Recommendation: content representation and content similarity, similarity based retrieval, other text classification methods, Knowledge Based Recommendation: Knowledge representation and reasoning, interacting with constraint based recommenders, interacting with case based recommenders,
<b>2</b>	<b>:Hybrid recommendation approaches:</b> Opportunities for hybridization, Monolithic hybridization design, parallelized hybridization design, pipelined hybridization design,
<b>3</b>	<b>:Evaluating recommender systems :</b> General properties of Evaluation research, popular evaluation designs, evaluation on historical datasets, alternate evaluation design
<b>4</b>	<b>: Recent developments:</b> Attacks on collaborative recommender systems, Online consumer decision making
<b>5</b>	<b>: Recommender systems and the next-generation web</b> Recommendations in ubiquitous environments.
<b>6</b>	<b>: Explanations in recommender systems</b> Explanations in constraint-based recommenders, explanation in case based

	recommenders, explanation in collaborative filtering recommenders.
<b>7</b>	:Case studies on Recommender System for various Business applications
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. “Innovation Management A Business Development Approach - Anil Gaikwad , Rajesh Kanthe –Lambert Academic Publication Dec 2019.</li> <li>2. “Recommender systems An Introduction” by DietmarJannach, Markus Zanker, AlexzanderFelfering, Gerhard friedrich by Cambridge university press2011</li> <li>3. Recommender systems handbook [book] by francescoricci, liorRokach, Paul b. Kantorin books</li> </ol>
<b>Reference Books</b>	<ol style="list-style-type: none"> <li>1. Amazon books Recommender System Practical Approach Dec-2019 Amazon Books .</li> <li>2. Tony Campbell Managing Risk and Information Security :- Protect to Enable. A-Press Open Access Book (Free).</li> <li>3. Anil Gaikwad , JyotiBiradar (Patil) Software Project Management made Easy Lambert Academic Publication 2019</li> </ol>
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/">https://nptel.ac.in/courses/</a> , NPTEL / Swayam <a href="http://www.edx.com">www.edx.com</a> <a href="http://www.coursera.com">www.coursera.com</a>

### ELECTIVE GROUP (08): INFORMATION SYSTEMS

<b>Subject Name</b>	<b>(08) B -Knowledge Management</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Knowledge about Information System and MIS with Implementation of MIS
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Using some basic concepts of software development , information system and applications of databases o business problems The objective of the course is to provide the basic skills of managing knowledge in organizations. Knowledge is an asset for retaining the competitive advantage of the organization. This course develops the capabilities of towards managing students to manage knowledge in organizations.
<b>Understanding</b>	By remembering students the basic concepts of Knowledge management students will understand the concepts of applications of knowledge management to the business problems .
<b>Applying</b>	Students will Have thorough knowledge about practical approach in designing knowledge management systems for business functions and apply the various advanced tools of software development .
<b>Analyzing</b>	To Measure the knowledge management applications with respect to business benefits . reduce the risk of decision making
<b>Evaluating</b>	Ability to select proper method to use proper knowledge management system for business applications and make it useful for business functions.
<b>Creating</b>	Design and create own knowledge management After going through this course a student should be able to understand : Will be able to understand the concepts of Knowledge and knowledge management. Can be able to design and develop Knowledge management systems for Business applications. Implementation of KM to various areas of Interest in Business Organizations.
<b>Unit No</b>	<b>Syllabus</b>
<b>1.</b>	<b>Introduction:</b> Definition, Scope and Significance of Knowledge Management , Difficulties of Knowledge Management, Techniques of KM – Implementation of KM, Organizational knowledge, Characteristics and Components of Organizational Knowledge
<b>2.</b>	<b>Drivers of knowledge Management</b> Pillars of knowledge Management, KM framework , Supply Chain of KM , Formulation of KMstrategy.
<b>3.</b>	<b>Technology and KM:</b> Technology components of KM – IT &KM , Ecommerce and KM
<b>4.</b>	<b>Total Quality Management and KM:</b> TQM and KM , Bench marking and KM.
<b>5.</b>	<b>Implementation of KM:</b> Discussion on Roadblocks to success, Implementing a KM programme , Critical Success Factors in KM , Implementation of KM
<b>6.</b>	<b>KM and Organizational Restructuring:</b>

	The Mystique of Learning, Organization:- Outcomes of learning, Learning and Change – Innovation, continuous Improvements, Corporate Transformation.
<b>7.</b>	<b>Case studies in Knowledge Management</b> Knowledge management in Health Care, Knowledge Management in Human Resource Management and other areas of Business Applications.
<b>Text Books</b>	<ol style="list-style-type: none"> <li>1. “Innovation Management A Business Development Approach - Anil Gaikwad , Rajesh Kanthe –Lambert Academic Publication Dec 2019.</li> <li>2. Honey Cutt : “Knowledge Management Strategies”, PHI, NewDelhi.</li> </ol>
<b>Reference Books</b>	<b>References (Books, Websites etc.):</b> <ol style="list-style-type: none"> <li>1.Madhukar Shukla:Competing Through Knowledge-Building a learning Organization (Response Books, NewDelhi.</li> <li>2.Awad, KM, Pearson Edn,2007.</li> <li>3. Barnes, Knowledge Management Systems, 1/e, Thomson2006.</li> <li>IkudiroNonka&amp;Hirotaka Takeuchi, “ The Knowledge – Creating Company”, Oxford University Press, London.</li> <li>4. Anil Gaikwad , JyotiBiradar (Patil) Software Project Management made Easy Lambert Academic Publication 2019</li> </ol>

### ELECTIVE GROUP (09): IOT

<b>Subject Name</b>	<b>(09) A - IoT Architecture Sensors and Fundamentals with Hands-on lab</b>
<b>No. of Credits</b>	<b>3</b>
<b>Pre Requisite</b>	School Level Mathematics. Basics of Programming and Networking
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Learning the concepts of IOT, Networking for IOT, Type of Sensor Network, Arduino Programming
<b>Understanding</b>	IOT Standards, connecting Technologies, Machine to Machine Communication
<b>Applying</b>	Implementing IOT with Arduino
<b>Analyzing</b>	Find the usability of IOT in various applications
<b>Evaluating</b>	Evaluate the performance of IOT solution and upgradation
<b>Creating</b>	Creating small applications for smart home/city using Arduino
<b>Unit No</b>	<b>Syllabus content</b>
<b>1.</b>	<b>IOT concepts:</b> <ul style="list-style-type: none"> <li>Technologies that led to evolution of IOT</li> <li>IOT and SCADA</li> <li>IOT and M2M</li> <li>IOT and Big Data</li> </ul> Relevance of IOT for the future <ul style="list-style-type: none"> <li>IOT in everyday life</li> <li>Internet of Everything</li> <li>IOT and Individual Privacy.</li> </ul> <b>Sensing, Actuation, Basics of Networking:</b> layered architecture, important protocols (MQTT, CoAP, REST, XMPP, AMQP)
<b>2.</b>	<b>IOT Standards :</b> Requirement of international standard ( case study) IOT standards in practice. Operating platforms /systems <b>connectivity Technologies:</b> 802.15.4, Zigbee, 6LoWPANs, RFID, HART, Bluetooth, ZWAVE, ISA 100.11-A
<b>3.</b>	<b>Sensor Networks:</b> components of sensor networks, deriving data from sensor nodes, different types of sensor networks and behavior of node in a sensor network, target tracking, wireless multimedia sensor network, nanonetworks, relationship between coverage and connectivity, stationary wireless sensor networks, mobile wireless sensor networks, UAV Networks
<b>4.</b>	<b>Machine-to-Machine Communications:</b> exchanging data between machines without human intervention, Low-end sensor nodes, mid-end sensor nodes, M2M ecosystem
<b>5.</b>	<b>Interoperability in IoT,</b> syntactic and semantic interoperability <b>Introduction to Arduino Programming:</b> Features of Arduino Arduino IDE Sketch Structure Arduino Function Libraries: Example : blink LED Operators, control statements, arrays, string, random number,

	interrupts
6.	Integration of Sensors and Actuators with Arduino: Sensor interface with Arduino, DTH Sensor Library, Type of Motor Actuators, integration of Actuator with Arduino
7.	IOT Applications: Lighting as a service ( case study) Intelligent Traffic systems ( case study) Smart Parking ( case study) Smart water management ( case study) Implement one small project
<b>Text Books</b>	<ul style="list-style-type: none"> <li>• Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118-47347-4, Willy Publications</li> <li>• Vijay Madisetti and ArshdeepBahga, “Internet of Things (A Hands-onApproach)”, 1 st Edition, VPT, 2014.</li> </ul>
<b>Reference Books</b>	1. Peter Waher, “Learning Internet of Things”, PACKT publishing, BIRMINGHAM – MUMBAI 3. Bernd Scholz-Reiter, Florian Michahelles, “Architecting the Internet of Things”, ISBN 978-3-642-19156-5 e-ISBN 978-3-642-19157-2, Springer 46. <a href="http://www.cse.wustl.edu/~jain/cse570-15/ftp/iot_prot/index.htm">http://www.cse.wustl.edu/~jain/cse570-15/ftp/iot_prot/index.htm</a>
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/105/106105166/">https://nptel.ac.in/courses/106/105/106105166/</a>

### ELECTIVE GROUP (09): IOT

<b>Subject Name</b>	<b>(09) B - Internet Of Things: implementation with Python and Raspberry Pi</b>
<b>No. of Credits</b>	<b>3</b>
<b>Pre Requisite</b>	School Level Mathematics. Basics of Programming and Networking
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Understand IoT sensors and technological challenges faced by IoT devices
<b>Understanding</b>	Understanding of IoT value chain structure (device, data cloud), application areas and technologies involved
<b>Applying</b>	Implementing IOT with Python and Raspberry Pi
<b>Analyzing</b>	Explore and learn about Internet of Things with the help of preparing projects designed for Raspberry Pi
<b>Evaluating</b>	Evaluate the performance of IOT solution and upgradation
<b>Creating</b>	Creating small applications for smart home/city using Python and Raspberry Pi
<b>Unit No</b>	<b>Syllabus content</b>
<b>1.</b>	<b>Introduction to Python Programming:</b> Python IDE (Spider, Anaconda), Data Types in Python, control statements, functions, file read/write operations, image read/write operations, Networking in Python,
<b>2.</b>	<b>Introduction to Raspberry Pi:</b> Basic architecture, installation, Raspberry Pi GPIO, OS setup, using GPIO pins, Taking Pictures using PiCam using Python on Raspberry Pi
<b>3.</b>	<b>Implementation of IOT with Raspberry Pi,</b> integration of sensors for data collection, dissemination of data for processing, visualization of data
<b>4.</b>	<b>Software Defined Networking:</b> <b>Origin of SDN</b> <b>SDN Architecture</b> <b>Rule Placement</b> <b>OpenFlow Protocol</b> <b>APIs in SDN</b> <b>Controller Placement</b> <b>Integration of SDN with IoT</b>
<b>5.</b>	Cloud Computing: Introduction, Service Model Service Management Sensor-cloud Fog Computing
<b>6.</b>	Smart Cites, Smart Homes, connected vehicles, Industrial IOT
<b>7.</b>	Data Handling and Analytics Implement one small project
<b>Text Books</b>	<ul style="list-style-type: none"> <li>• Daniel Minoli, “Building the Internet of Things with IPv6 and MIPv6: The Evolving World of M2M Communications”, ISBN: 978-1-118-47347-4, Willy Publications</li> <li>• Vijay Madisetti and ArshdeepBahga, “Internet of Things (A Hands-onApproach)”, 1 st Edition, VPT, 2014.</li> </ul>
<b>Reference Books</b>	1. Jan Holler, VlasiosTsiatsis, Catherine Mulligan, Stefan Avesand, StamatisKarnouskos, David Boyle, “From Machine-to-Machine to the Internet

	<p>of Things: Introduction to a New Age of Intelligence”, 1 st Edition, Academic Press, 2014.</p> <p>2. Peter Waher, “Learning Internet of Things”, PACKT publishing, BIRMINGHAM – MUMBAI</p> <p>3. Bernd Scholz-Reiter, Florian Michahelles, “Architecting the Internet of Things”, ISBN 978-3-642-19156-5 e-ISBN 978-3-642-19157-2, Springer 46.  <a href="http://www.cse.wustl.edu/~jain/cse570-15/ftp/iot_prot/index.htm">http://www.cse.wustl.edu/~jain/cse570-15/ftp/iot_prot/index.htm</a></p>
<b>MOOC on NPTEL</b>	<a href="https://nptel.ac.in/courses/106/105/106105166/">https://nptel.ac.in/courses/106/105/106105166/</a>

### ELECTIVE GROUP (10): BIG DATA

<b>Subject Name</b>	<b>(10) A - Introduction to Big Data</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Preliminary knowledge of computer, Data Mining, Data Warehousing Concepts.
<b>Course Objectives</b>	To introduce learner with Big Data Concept, decision making by doing analysis on the data and managing the data using Big Data Concept like Business Intelligence Concept, decision making by Business Intelligence Tools on Applications such as Finance, Marketing, Education etc.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>Remember the definitions of concepts of Big Data and Business Intelligence Tools.</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>Understand the concept of Big Data and Business Intelligence Tools.</li> <li>Understand decision making Theory and Strategies for Big Data.</li> <li>Understand different Business Intelligence Applications.</li> <li>Understanding the use of Business Intelligence for AI and Security.</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>Knowledge of Decision making using analysis on the Big Data</li> <li>Applying on different Big Data Applications in Industries</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>Identify and study the Big Data Analysis by Decision Theory and Strategy.</li> <li>User experience on Big Data and Business Intelligence Tools.</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>Applying Decision Making Theory on Big Data.</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>Case Studies: Knowledge about different applications used in industries.</li> <li>Using Business Intelligence in AI.</li> <li>Using Business Intelligence for Security</li> </ul>
<b>Unit No</b>	<b>Syllabus content</b>
1	<b>Introduction:</b> Big Data History, The Big Data Business Opportunity- Business Transformation Imperative, Big Data Business Model, Business Impact of Big Data, <b>Big Data In Organization:</b> Data Analytics Lifecycle, <b>Data Scientist Roles and Responsibilities</b> – Discovery, Data Preparation, Model Planning, Model Building, Communicate Results, Operationalize, New Organizational Roles, Liberating Organizational Creativity.
2	<b>.Decision Theory And Strategy:</b> Business Intelligence Challenge, Big Data User Interface Ramifications, Human Challenge of Decision Making, <b>Strategy for Decision Making-</b> Big Data Strategy Document, Case Study. <b>Value Creation Process:</b> Understanding Big Data Value Creation, <b>Michael Porter's Value Creation Models:</b> Michael Porter's Value Chain Analysis, Case Study.
3	<b>Big Data User Experience:</b> The Unintelligent User Experience, Understanding the Key Decisions to Build a Relevant User Experience, Using Big Data Analytics to Improve Customer Engagement, Uncovering and Leveraging Customer Insights, Big Data can Power a New Customer Experience, <b>Big Data Use Cases:</b> 1. Research Business Initiatives, 2. Acquire and Analyze your Data, 3. Brainstorm New Ideas, 4. Prioritize Big Data Use Cases, 5. Document Next Steps, The Prioritization Process.
4	<b>Introduction To Business Intelligence Applications:</b> Introduction to Big Data, Business Intelligence Data Mining, and Data Warehousing, What are Business Intelligence Applications (BIA). Features of BIA. <b>Sales, Finance And Marketing:</b> Introduction to Sales, Finance and

	Marketing Concept, <b>Education And Learning:</b> Introduction to Education System, Learning Concept.
5	<b>Vertical AI Applications:</b> Overview of AI, What is Vertical AI, Features of Vertical AI, Use of Business Intelligence in Vertical AI, Case Study.
6	<b>Security:</b> Define Security, Security in Big Data, Problems with Security, Business Intelligence for Security, Case Study.
7	<b>Lifescience</b> Introduction to Life Science, Life Science Intelligence, Features of Life Science Intelligence, Use of Life Science Intelligence in Decision Making, Case Study.
<b>Text Books</b>	
<b>Reference Books</b>	<p>1. Big Data- Understanding How Big Data Power Big Business –By Bill Schmarzo</p> <p>2. Edureka lectures <b>Link:-</b><a href="https://www.youtube.com/watch?v=A02SRdyoshM">https://www.youtube.com/watch?v=A02SRdyoshM</a></p> <p>3. Business Intelligence Strategy -By John Boyer, Bill Frank, Brain Green, Tracy Harris</p> <p><b>Suggested MOOC :</b>Please refer these websites for MOOCS: NPTEL / Swayam <a href="http://www.edx.com">www. edx.com</a>, <a href="http://www.coursera.com">www.coursera.com</a></p>

### ELECTIVE GROUP (10): BIG DATA

<b>Subject Name</b>	<b>(10) B -Business Intelligence Tools with HADOOP</b>
<b>No. of Credits</b>	3 Credits
<b>Pre Requisite</b>	Preliminary knowledge of computer, Big Data Analysis and Business Intelligence.
<b>Course Objectives</b>	To introduce learner with Big Data Concept and HADOOP tool for Business Intelligence. Using different Advance Excel Functions (like Optimization) and implementing it on Big Data for decision making. By solving Case Studies the students will get real example of using BI Tools in industry. It will also introduce learner with decision making by doing analysis on the data using HADOOP Tool and also managing the Big Data using HADOOP.
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	<ul style="list-style-type: none"> <li>Remember the concepts of Business Intelligence Tools and HADOOP.</li> </ul>
<b>Understanding</b>	<ul style="list-style-type: none"> <li>Understand the Excel Tools for Business Intelligence.</li> <li>Understand working with Macros.</li> <li>Understand HDSF, Mapping and Reducing in HADOOP Environment.</li> <li>Understanding the Clusters and Nodes in HADOOP Environment.</li> </ul>
<b>Applying</b>	<ul style="list-style-type: none"> <li>Knowledge of Decision making using analysis on the Big Data using Excel Tools.</li> <li>Knowledge of Decision making using HADOOP analysis on the Big Data</li> </ul>
<b>Analyzing</b>	<ul style="list-style-type: none"> <li>Applying the Excel Tools or Mapping and Reducing on Big Data.</li> <li>Implementing Environment Setup of HADOOP.</li> </ul>
<b>Evaluating</b>	<ul style="list-style-type: none"> <li>Applying HADOOP Environment for Analysis on Big Data.</li> </ul>
<b>Creating</b>	<ul style="list-style-type: none"> <li>Case Studies: for Big Data Analysis using Excel tools or HADOOP</li> <li>Using features of Macros.</li> </ul>
<b>Unit No</b>	<b>Syllabus Contents</b>
<b>1</b>	<b>Introduction To Big Data and Business Intelligence</b> Overview of - Data Mining, Data Warehousing, Big Data, How Business Intelligence is useful for Big Data, Big Data Problems. Introduction to BI, <b>Data Cleaning</b> -Editing a Workbook, Data Cleaning Using Text Functions, Using Validation To Keep Data Clean, <b>Working with Multidimensional Data</b> - Pivot Tables, Pivot Charts.
<b>2</b>	<b>Applications Of Business Intelligence and Excel Tools</b> CRM Domain, Banking Domain, Health Care Domain, Mobile Industry Domain, Creation of a New Product, Providing Personalized Services, <b>Optimization Modeling With Solver:</b> Introduction to MS-Excel and MS-Excel Formulas, Understanding Optimization Modeling, Setting Up a Solver Worksheet, Solving an Optimization Modeling Problem, Reviewing the Solver Reports, <b>Working With Solver:</b> Working With the Solver Options, Setting a Limit on Solver, Understanding the Solver Error Messages, Case Studies (Solver Problems).
<b>3</b>	<b>Advance Excel Tools:</b> <b>Using Shared Work Books-</b> Sharing a workbook, Opening and editing a shared workbook, Tracking changes, Resolving conflict in a shared workbook, Multiple workbooks- Linking workbooks, Editing the Link, Consolidating the workbook.
<b>4</b>	<b>Working With Macros:</b> Introduction to Macros? Where are Macros, Features of Macros, <b>Working with Macros-</b> Display the developer Tab, Changing Macro security Settings,

	Recording and running a Macro.
5	<b>Introduction To HADOOP:</b> Hadoop Architecture, MapReduce, Hadoop Distributed File System, How Does Hadoop Work?, Advantages of Hadoop. <b>HDFS Overview:</b> Features of HDFS, HDFS Architecture, Starting HDFS, Listing Files in HDFS, Inserting Data into HDFS, Retrieving Data from HDFS, Shutting Down the HDFS.
6	<b>MAPREDUCE:</b> What is MapReduce?, The Algorithm for MapReduce, Inputs and Outputs (Java a Perspective), Analyze different use-cases where MapReduce is used, Differentiate between traditional way and MapReduce way. <b>Introduction To Hadoop Features:</b> New Big Data Architecture, Introducing HADOOP Features – Apache Hive, Apache HBase, Pig.
7	<b>Multi Node Cluster:</b> Multi Node Cluster, Install Java, Creating User Account, Mapping the Nodes, Installing Hadoop, Configuring Hadoop, Start Hadoop Services, Adding New Data Node in the Hadoop Cluster, Removing New Data Node from the Hadoop Cluster. <b>Environment Setup:</b> Pre-installation Setup, Installing Java Downloading Hadoop Hadoop Operation Modes Installing Hadoop in Standalone Mode Installing Hadoop in Pseudo Distributed Mode Verifying Hadoop Installation, Implement basic Hadoop commands on terminal.

### ELECTIVE GROUP (11): CYBER SECURITY

<b>Title of the Course</b>	<b>(11) A -Introduction to Information Security</b>
<b>Number of Credits</b>	<b>3 Credits</b>
<b>Pre-Requisites</b>	Information about computer hardware, system and application software, and networking
	<b>Course Outcomes as per Bloom's Taxonomy</b>
<b>Remember</b>	Concepts involved in information systems
<b>Understand</b>	Security concerns involving information systems
<b>Apply</b>	Understanding of concerns to improve information security
<b>Analyze</b>	Real-life scenarios with respect to information systems
<b>Evaluate</b>	Scenarios involving information systems and security concerns
<b>Create</b>	Information security awareness to address real-world scenarios
<b>Unit No</b>	<b>Syllabus contents</b>
<b>1</b>	Information Security Concepts <ul style="list-style-type: none"> <li>▪ Confidentiality, Integrity and Availability of Information</li> <li>▪ Identification, Authentication and Authorization</li> <li>▪ Security Principles and Models</li> </ul>
<b>2</b>	Physical Security <ul style="list-style-type: none"> <li>▪ Facility Requirement</li> <li>▪ Perimeter Security</li> <li>▪ Fire Protection</li> <li>▪ Fire Suppression</li> <li>▪ Power Protection</li> <li>▪ General Environmental Protection</li> <li>▪ Equipment Failure Protection</li> </ul>
<b>3</b>	Network Security <ul style="list-style-type: none"> <li>▪ Secure Network design</li> <li>▪ Firewalls</li> <li>▪ WLAN Security</li> <li>▪ VPNs</li> <li>▪ Types and Sources of Network Threats</li> </ul>
<b>4</b>	Operating System Security <ul style="list-style-type: none"> <li>▪ Windows</li> <li>▪ Linux/UNIX</li> </ul>
<b>5</b>	Database Security <ul style="list-style-type: none"> <li>▪ MS SQL</li> </ul>
<b>6</b>	Web Application Security <ul style="list-style-type: none"> <li>▪ Web Application Vulnerabilities</li> <li>▪ Secure Coding Techniques</li> <li>▪ Continuous Security Testing and Assessments</li> </ul>
<b>7</b>	Compliance Standards <ul style="list-style-type: none"> <li>▪ IT Act</li> <li>▪ ISO 27001</li> </ul>

	▪ ITIL Framework
<b>Text Book</b>	Shimonski R., <i>Certified Ethical Hacker - Study Guide</i> , Sybex
<b>Reference Book</b>	Lammle T., <i>CCNA - Routing and Switching - Complete Study Guide</i> , Sybex
<b>Supplementary SWAYAM Course</b>	Cyber Security ( <a href="https://swayam.gov.in/nd2_cec20_cs15/preview">https://swayam.gov.in/nd2_cec20_cs15/preview</a> )

<b>Title of the Course</b>	<b>(11) B - Information Security Threats and Mitigation Strategies</b>
<b>Number of Credits</b>	<b>3 Credits</b>
<b>Pre-Requisites</b>	Information about computer hardware, system and application software, and networking
	<b>Course Outcomes as per Bloom's Taxonomy</b>
<b>Remember</b>	Concepts involved information security domain
<b>Understand</b>	Security vulnerabilities and threats
<b>Apply</b>	Understanding of security threats to mitigate them
<b>Analyze</b>	Real-life scenarios with respect to information security
<b>Evaluate</b>	Scenarios involving information security threats
<b>Create</b>	Awareness about mitigation of information security threats in real-world scenarios
<b>Unit No</b>	<b>Syllabus contents</b>
<b>1</b>	<b>: Introduction to Information Security Threats</b> <ul style="list-style-type: none"> <li>▪ TCP/IP Fundamentals</li> <li>▪ Operating System Fundamentals</li> <li>▪ Web Application and Database Fundamentals</li> <li>▪ Introduction to Ethical Hacking</li> <li>▪ Advanced Persistent Threats</li> </ul>
<b>2</b>	<b>: Information Gathering</b> <ul style="list-style-type: none"> <li>▪ Footprinting</li> <li>▪ Advanced Google Hacking</li> <li>▪ Nmapping the network</li> <li>▪ Fingerprinting</li> </ul>
<b>3</b>	<b>Exploitation</b> <ul style="list-style-type: none"> <li>▪ Hacking Networks</li> <li>▪ Hacking Servers</li> <li>▪ Hacking Databases</li> <li>▪ Password Cracking</li> </ul>
<b>4</b>	<b>Advanced Exploitation</b> <ul style="list-style-type: none"> <li>▪ Hacking WLANs</li> <li>▪ Evading IDS, Firewalls</li> <li>▪ Web Application Hacking</li> <li>▪ Advanced Web Hacking</li> <li>▪ Hacking Web Browsers</li> </ul>
<b>5</b>	<b>: Social Engineering</b> <ul style="list-style-type: none"> <li>▪ Introduction to Social Engineering</li> <li>▪ Common Types of Attacks</li> <li>▪ Online Social Engineering</li> </ul>
<b>6</b>	<b>: Cryptography</b> <ul style="list-style-type: none"> <li>▪ Introduction to Cryptography</li> <li>▪ Encryption and Decryption</li> <li>▪ Cryptographic Algorithms</li> <li>▪ Digital Signature</li> <li>▪ Cryptography Tools</li> </ul>

	<ul style="list-style-type: none"> <li>▪ Cryptography Attacks</li> </ul>
7	<b>: Malware Attacks</b> <ul style="list-style-type: none"> <li>▪ Viruses</li> <li>▪ Worms</li> <li>▪ Trojans</li> </ul>
<b>Text Book</b>	Shimonski R., <i>Certified Ethical Hacker - Study Guide</i> , Sybex
<b>Reference Book</b>	Howard M., <i>Writing Secure Code</i> , Microsoft Press
<b>Supplementary SWAYAM Course</b>	Introduction to Cyber Security ( <a href="https://swayam.gov.in/nd2_nou20_cs02/preview">https://swayam.gov.in/nd2_nou20_cs02/preview</a> )

## ELECTIVE GROUP (12) : DATA MANAGEMENT

<b>Subject Name</b>	<b>(12)A : Data Management Environment</b>
<b>No. of Credits</b>	3
<b>Pre Requisite</b>	Basic Knowledge of Data in the Business
<b>Course Objective</b>	<ul style="list-style-type: none"> <li>To practice the application of the concepts related to data management .</li> <li>To make students familiar with data management</li> </ul>
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Able to describe the basic concepts, data management.
<b>Understanding</b>	Able to Interpret the data.
<b>Applying</b>	Able to Solve the data requirement on understanding the case.
<b>Analyzing</b>	Analyse the data quality.
<b>Evaluating</b>	Ability to judge functionality of data management
<b>Creating</b>	Design data management model with proper validation
<b>Unit No</b>	<b>Contents</b>
<b>1.</b>	<b>Introduction To Data Management</b> Meaning of data management, need of data management , data management process, big data ,data management system components.
<b>2.</b>	<b>Data governance</b> Data governance meaning , importance , objectives of data governance, Introduction to Data Governance Tools , concept of data asset, types of data assets, concept of data steward,
<b>3.</b>	<b>Data Warehousing and Business Intelligence Management</b> Business intelligence, OLAP ,Data mart, Data mining, Data movement (Extract, transform, load), Data warehouse
<b>4.</b>	<b>Document, Record and Content Management</b> Meaning of Document management, document management system, Record management, Meaning of content management ,content management process.
<b>5.</b>	<b>Database Maintenance</b> Data maintenance, its need, database administrator (DBA) ,DBA role ,data base administration system, Database management system.
<b>6.</b>	<b>Data Architecture ,Analysis and Design</b> Data analytics, data architecture, data modeling ,types of data modeling , data modeling techniques.
<b>7.</b>	<b>Data Quality Management</b> Data cleansing ,data integrity, data enrichment, data quality parameters, data quality assurance , Capability maturity management, Data maturity model(DMM), genuine capability
<b>Reference Books</b>	1. DAMA-DMBOK: Data Management Body of Knowledge DMBOK (2 <sup>nd</sup> Edition) , Technics Publications LLC 2. Master Data Management and Data Governance by Alex Berson, Larry Dubov , McGraw-Hill Publications

<b>Subject Name</b>	<b>(12)B : Industrial Data Management and Security</b>
<b>No. of Credits</b>	3 credits
<b>Pre Requisite</b>	Basic idea of need of data hiding
<b>Course Objective</b>	To familiarize students to different types of data management and industrial data security
<b>Cognitive Abilities</b>	<b>Course Outcome as per Blooms Taxonomy</b>
<b>Remembering</b>	Memorise remind data hiding and data security concepts
<b>Understanding</b>	Understanding need of data management and security
<b>Applying</b>	Identify data security threats and application of security tools
<b>Analyzing</b>	Analysis of data management
<b>Evaluating</b>	Evaluation of threats and application of security measures
<b>Creating</b>	Creation of protective environment for sharing industrial data
<b>Unit No</b>	<b>Contents</b>
1.	<b>Reference and master data management</b> Meaning of Reference data, importance of reference data management , reference data management process, reference data evaluation criteria ,data integration, master data management
2.	<b>Meta Data Management</b> Meaning of Meta-data, Need of Meta data management, Metadata discovery, Metadata publishing, Metadata registry
3.	<b>Contact Data Management</b> Business continuity planning ,marketing operations, Customer data integration, identify management ,identify theft , address(geography),postal code, email address, telephone number.
4.	<b>Industrial Automation of Management Processes</b> Management processes and its interdependence ,Need of automation of management processes in industries, ERP software ,CRM software, introduction to SAP
5.	<b>Industrial Data Security</b> Meaning of Data security ,need of industrial data security , four key issues in data security, Data access, data erasure, data privacy, data security, data security technologies , data security Vs Data privacy.
6.	<b>Industrial Data Security Threats and management</b> Threats in data security, Industrial information security threats , Data Protection Practices- operational and technical ,industrial security threats/risks and mitigations for industrial network control system.
7.	<b>Advanced data security tools</b> Wireshark, Kali linux, John the ripper,metasploit,cain and abel etc..
<b>Reference Books</b>	1. Master Data Management and Data Governance by Alex Berson, Larry Dubov , McGraw-Hill Publications 2. Data Mining: Concepts and Techniques, Third Edition , The Morgan Kaufmann Series in Data Management Systems 3. Data Management by Richard T Watson, Publisher eGreen Press 4. Big Data security Shibakali Gupta, Indradip Banerjee and Siddhartha Bhattacharyya , Published by De Gruyter
